ANNUAL REPORT

OF THE

DEPARTMENT OF EDUCATION

FOR THE YEAR ENDING NOVEMBER 30, 1933

ISSUED IN ACCORDANCE WITH SECTION 2 OF CHAPTER 69
OF THE GENERAL LAWS

PART I

DEPARTMENT OF EDUCATION

PAYSON SMITH, *Commissioner of Education*

Members of Advisory Board

Ex officio THE COMMISSIONER OF EDUCATION, *Chairman*

Term expires

1933. HENRY B. SAWYER, 85 Devonshire Street, Boston
1933. WALTER V. McDUFFEE, Central High School, Springfield
1934. A. LINCOLN FILENE, 426 Washington Street, Boston
1934. THOMAS H. SULLIVAN, Slater Building, Worcester
1935. MRS. ELLA LYMAN CABOT, 101 Brattle Street, Cambridge
1935. MRS. ANNA M. POWER, 15 Ashland Street, Worcester
GEORGE H. VARNEY, *Business Agent*
ARTHUR B. LORD, *Supervisor of Office Organization*

Division of Elementary and Secondary Education and State Teachers Colleges

FRANK W. WRIGHT, *Director*

SUPERVISORS

- BURR F. JONES, *Elementary Education*
JEROME BURTT, *Secondary Education*
ARTHUR B. LORD, *Educational Research and Statistics, Special Schools and Classes*
HARRY E. GARDNER, *Teacher Placement*
CARL L. SCHRADER, *Physical Education*
ALMA PORTER, *Assistant, Physical Education*
IDA E. SCHEIB, *Assistant, Safety Education*

PRESIDENTS OF STATE TEACHERS COLLEGES AND THE MASSACHUSETTS SCHOOL OF ART

- | | |
|---|---------------------------------|
| ZENOS E. SCOTT, Bridgewater | CLARENCE M. WEED, Lowell |
| CHARLES M. HERLIHY, Fitchburg | ALBERT G. ELDRIDGE, North Adams |
| FRANCIS A. BAGNALL, Framingham | J. ASBURY PITMAN, Salem |
| HERBERT H. HOWES, Hyannis | CHARLES RUSSELL, Westfield |
| WILLIAM B. ASPINWALL, Worcester | |
| C. EDWARD NEWELL, Massachusetts School of Art, Boston | |

Division of Vocational Education

ROBERT O. SMALL, *Director*

SUPERVISORS

Subdivision of Supervision

- RUFUS W. STIMSON, *Field of Agricultural Schools and Departments*
DANIEL H. SHAY, *Field of Industrial Schools for Boys and Men*
JOHN E. ALCOTT, *Field of Vocational Art Education in Industry and Business*
CAROLINE H. WILSON, *Assistant, Fields of Industrial Schools, Household Arts Schools and Departments, and Continuation Schools for Girls and Women*
VERNA PAYSON, *Assistant, Field of Household Arts Schools and Departments*

Subdivision of Vocational Teacher-Training

- M. NORCROSS STRATTON, *Co-ordinator, Teacher-Training and Supervision, and Fields of Industrial Schools for Boys and Men, and Continuation Schools for Boys*
FRANKLIN E. HEALD, *Field of Agricultural Schools and Departments (Resident, Massachusetts State College, Amherst)*
WINTHROP S. WELLES, *Part-time Assistant, Field of Agricultural Schools and Departments (Resident, Massachusetts State College, Amherst)*
FREDERICK A. COATES, *Assistant Field of Industrial Schools for Boys and Men*
JOHN I. LUSK, *Assistant, Field of Continuation Schools for Boys*
ANNA A. KLOSS, *Fields of Industrial Schools, Household Arts Schools and Departments, and Continuation Schools for Girls and Women*
MARTHA T. WONSON, *Assistant, Field of Household Arts Schools and Departments*
VERNA PAYSON, *Assistant, Field of Household Arts Schools and Departments*
LOU LOMBARD, *Assistant, Field of Household Arts (Resident, Framingham State Teachers College)*

ANNUAL REPORT

REPORT OF THE COMMISSIONER

LEGISLATIVE PROPOSALS, 1934

The Department of Education presents the following recommendations for legislation as set forth in the drafts of bills submitted to the General Court:—

I. *Increasing the Amount that may be expended as State Aid for Students in State Teachers Colleges and in the Massachusetts School of Art.*—The Department has authority, under chapter 74, section 5, to expend not more than \$4,000 annually in aiding students in the State Teachers Colleges. Some financial aid is necessary in order to enable many students to complete their work. The Legislature increased this amount to \$6,000 for the year 1933.

The number of students finding themselves unable to meet the expense at the State Teachers Colleges and the Massachusetts School of Art have materially increased to the extent that the \$6,000 available during the past year has been inadequate to meet the needs of many worthy students.

I am asking, therefore, that section 5, chapter 74, be amended by making available \$10,000 for the aid of worthy students in these institutions.

II. *Resolve authorizing the Release of an Easement on Certain Land in Framingham.*—In a deed from Clark to Neary reference is made to an easement granted by C. C. Esty to the Commonwealth of Massachusetts by an instrument dated March 20, 1876, and recorded with said Deeds, Book 1388, page 166. At the time when this easement was granted, the town of Framingham had no public water supply, and the purpose of the easement was to provide for an adequate water supply for the Framingham State Teachers College grounds and buildings, by the construction of a well and windmill on the land then owned by said Esty and the maintenance of a water pipe from said well to said Teachers College location. After the town of Framingham installed its public water supply and the State Teachers College buildings were connected therewith, the necessity for any other source of water supply ceased to exist, and the well, windmill and water supply pipes, above referred to, were entirely removed, but the easement referred to in the deed from Clark to Neary, having been made a matter of record at the Registry of Deeds, remains as an encumbrance on the title to the said land.

BUILDING SURVEY

I wish to call attention to the report of a survey of schoolhouse construction which is included herein. This report, covering the period from the World War up to the present time, presents some very significant facts. The Commonwealth has expended since 1918 \$129,000,000 for new buildings and equipment. These new facilities accommodate nearly one third of all pupils in the public schools. Incidentally, the survey reflects the change that has taken place in school organization. The great majority of the new elementary schools contain only pupils in Grades I to VI; and a large majority of the new high school buildings are either junior high, senior high, or six-year high, thus indicating that in a great many communities the secondary school period now begins with the seventh grade rather than with the ninth grade as was true heretofore.

DIVISION OF ELEMENTARY AND SECONDARY EDUCATION AND STATE TEACHERS COLLEGES

ROY LEON SMITH

President of State Teachers College at North Adams
AUGUST 11, 1921-JUNE 8, 1932

Roy Leon Smith, President of the State Teachers College at North Adams, died on Wednesday, June 8, 1932. Mr. Smith had served as head of the institution for eleven years and for nine years previously as a teacher. He was a graduate of Syracuse University and had wide experience in educational work in New York State and Massachusetts.

Mr. Smith was prominent in the civic life of the community. He was recognized as an able teacher and administrator. When he succeeded to the principalship of the normal school, his predecessor, Mr. Frank Fuller Murdock, said of him, "He enjoys the respect of his associates not only in North Adams but throughout the entire State."

ARTHUR CLARKE BOYDEN

Principal of State Normal School at Bridgewater
1906-1932
President of the State Teachers College at Bridgewater
APRIL 2, 1932-MARCH 15, 1933

Dr. Arthur Clarke Boyden succeeded his father, Albert G. Boyden, as Principal of the State Normal School at Bridgewater in 1906. The principalship of the two men covered a span of seventy-three years of leadership in a single institution, a service probably unparalleled in the annals of American education.

On March 15, at ten o'clock P.M., Arthur Clarke Boyden laid down what, in the most literal sense, had been his life work. At his desk almost to the end, he gave himself unreservedly to this institution, and finished his work surrounded by the associations that had been to him the breath of life itself. As was said by a friend: "He stepped off from the summit, his laurels undiminished and his lights undimmed."

In conferring an honorary degree upon him, President George G. Olds of Amherst in a highly appropriate citation said:

"Arthur Clarke Boyden, Principal of the State Normal School at Bridgewater, Massachusetts, graduate of Amherst in the class of 1876; with more than half a century of active service behind you; of a family of great teachers; head of an institution which has served as pattern and guide for all schools of its kind; training teachers for our Commonwealth and thus preparing young men and women for the greatest profession in the world; a man honored by the unstinted appreciation of your colleagues and recognized because of your words and acts in the front ranks of our educators; it gives me pleasure to confer upon you the degree of Doctor of Humane Letters."

On May 11, 1933, the Advisory Board of Education adopted the following vote:

VOTED, That in recognition of the distinguished service of Albert G. Boyden and Arthur C. Boyden, extending over a period of seventy-three years, the general administration building at the State Teachers College at Bridgewater be named Boyden Hall.

NEW PRESIDENTS OF TEACHERS COLLEGES

ALBERT G. ELDRIDGE

President of the State Teachers College at North Adams

Albert G. Eldridge, who had been serving as acting-president of the State Teachers College at North Adams following the death of Mr. Roy Smith, was appointed President of the institution and took office on June 15, 1933.

Mr. Eldridge is a graduate of Harvard University. He holds also the degree of Master of Arts from Columbia University. Following graduation from Harvard, Mr. Eldridge taught science in the New Bedford High School. He then served as superintendent of schools in the Blackstone and Clarksburg supervisory unions prior to beginning his teaching service at the State Teachers College at North Adams in 1916. Mr. Eldridge has served as instructor in the summer sessions of Johns Hopkins University and the State Teachers College at Hyannis.

ZENOS E. SCOTT

President of the State Teachers College at Bridgewater

Dr. Zenos E. Scott, who was superintendent of schools at Springfield, was appointed to succeed Dr. Arthur Clarke Boyden as President of the State Teachers College at Bridgewater. Dr. Scott assumed his duties on September 1, 1933.

Dr. Scott has had a wide and varied experience in school administration. He served as superintendent of schools at Asbury Park and Trenton, New Jersey, and at Louisville, Kentucky. He has been, since 1923, superintendent of schools at Springfield, Massachusetts. Prior to his service in Louisville, he was, for four years, Assistant Commissioner of Education, in charge of Elementary Education, for the State of New Jersey.

Dr. Scott has served as an instructor in the summer sessions of Teachers College, Columbia University; William and Mary College; and the University of Vermont. He has served also as a lecturer in the Graduate Schools of Education at Harvard and Yale.

The new President of Bridgewater State Teachers College is a graduate of the Indiana State Normal School and of Evansville College. He holds the degree of Master of Arts from Teachers College, Columbia University, and a Pd.D. (Honorary) from Evansville College.

COURSES OFFERED IN STATE TEACHERS COLLEGES

The courses now offered in the State Teachers colleges are as follows:—

COURSES OFFERED AND WHERE

1. *Elementary Course*. — Three years — diploma. Prepares teachers for elementary school. Bridgewater, Fitchburg, Framingham, Hyannis, Lowell, North Adams, Salem, Westfield, and Worcester.
2. *Elementary Course*. — Four years — degree.* Prepares teachers for elementary school. Bridgewater, Fitchburg, Framingham, Hyannis, Lowell, North Adams, Salem, Westfield, and Worcester.
3. *Kindergarten-Primary Course*. — Three years — diploma. Bridgewater and North Adams.
4. *Junior High School Course*. — Four years — degree.* Bridgewater, Fitchburg, Hyannis, Salem, Westfield, and Worcester.
5. *Senior High School Course*. — Four years — degree.* Bridgewater and Worcester.
6. *Household Arts Course*. — Four years — degree.* Framingham.
7. *Vocational Household Arts Course*. — Four years — degree.* Prepares teachers of homemaking for vocational and continuation schools, and vocational departments in high schools. Framingham.
8. *Art Education*. — Drawing and Painting — four years — diploma; Modeling and Sculpture — four years — diploma; General Design — four years — diploma; Costume Design and Illustration — four years — diploma; Public School Art (prepares teachers and supervisors of art and handwork) — four years — degree.* Special application form may be secured from the Massachusetts School of Art.
9. *Commercial Course*. — Four years — degree.* Prepares teachers and supervisors of commercial work in junior and senior high schools. Salem.
10. *Practical Arts Course*. — Four years — degree.* Prepares teachers of shop work and mechanical drawing in junior and senior high schools. Fitchburg.
11. *Music Supervisors Course*. — Four years — degree.* Prepares teachers and supervisors of music. Lowell.
12. *Course for Teachers of Mentally Retarded Children*. — Four years — degree.* Salem.
13. *School Librarians Course*. — Four years — degree.* Bridgewater.

* Degree of Bachelor of Science in Education.

PROGRESS IN SCHOOLHOUSING FACILITIES

When Horace Mann was appointed to the position of Secretary of the Board of Education, one of the first needs that came to his attention was that of better school buildings and equipment. In 1838 he issued his well-known report on schoolhouses, having made a survey of conditions throughout the State. At that time there were approximately 3,000 schoolhouses in use. Nearly all of these buildings were of the one-room, district school type, having an average value of about \$200 and an average capacity of 42 pupils. In 1867 another study revealed 3,350 schoolhouses in Massachusetts having an average value of \$2,866 and accommodating an average enrolment of 81 pupils. The one-room type still prevailed. In 1918 another survey showed 3,001 school buildings having an average value of \$31,525 and an average membership of 182 pupils. In 1933 there are 2,724 school buildings in use. The average value is \$146,428 and the average membership is 271. From the foregoing data it is interesting to observe the very striking increase in our per-pupil investment in schoolhouse facilities during the past century. In 1838 there was invested in school buildings in Massachusetts approximately \$5 for each pupil in attendance; in 1867 this investment had increased to \$35 per pupil; in 1918 to \$173; and in 1933 to \$540.

During the World War period and immediately thereafter a real shortage of schoolhousing accommodations appeared. Owing to the high construction costs during war time, as well as to the fact that the energies of the people were chiefly directed toward the prosecution of the war, there was almost a complete cessation of schoolhouse construction. An inquiry as to the extent of school building shortage made in 1921 revealed the fact that 41,000 pupils were attending school on the platoon plan. Such conditions were found chiefly in the cities and large towns.

These pupils were losing approximately 20 per cent of their school time. It should be further stated that many communities were continuing the use of a great many old buildings lacking both in suitable hygienic conditions and in necessary educational facilities.

It is a great satisfaction to be able to report that since the war period the citizens of the Commonwealth have made most commendable efforts to provide thoroughly up-to-date school buildings and equipment. Probably never before in our history has there been so much activity in schoolhouse construction. Very much credit must be given to local initiative and particularly to local school officials. The usual course of procedure involved the appointment by the town or city government of a survey committee to study school building needs. Having made its examination, this committee reported its findings in special or regular town meeting or to the city government and accompanied its report with definite recommendations. The needed funds were then voted and a building committee appointed to select an architect and have general supervision of the construction. At least 10 per cent of the cost of construction was raised in the tax levy of the first year. Bonds were issued for the remainder, involving payments of principal and interest charges over a period of from five to twenty years.

Though the initiative in schoolhouse construction is usually taken by local school officials, the State Department of Education has endeavored to accept every opportunity to assist local officials by making surveys of schoolhouse conditions and school building needs in very many towns and cities, by advising with school committees and building committees in the planning of school buildings, and by addressing public meetings held for the purpose of informing the citizens as to needed improvements and extensions. In order to determine the full extent to which our schools have been provided with modern housing facilities since the war period as well as to assemble helpful information in regard to location, sizes, types, and costs of new buildings, the Department this year made a State-wide survey of new schoolhouse construction. A summary of this study is set forth in the tables below.

TABLE I. — SCHOOLHOUSE CONSTRUCTION IN MASSACHUSETTS SINCE 1918

	Cost of New Buildings and Equipment		Cost of Additions to Existing Buildings and Equipment		Pupils Accommodated in New Buildings and Additions	Per Cent of Total School Membership Accommodated in New Buildings and Additions
	Buildings	Equipment	Buildings	Equipment		
Group I (38 cities) *	\$65,503,245	\$3,476,976	\$15,551,221	\$1,001,572	150,143	32.1
Group II (83 towns)	24,434,349	1,815,268	7,276,654	467,430	64,932	36.1
Group III (108 towns)	6,506,027	472,931	707,478	42,010	16,701	31.8
Group IV (125 towns)	1,612,787	82,038	298,883	13,763	6,019	25.8
STATE TOTAL	\$98,056,408	\$5,847,213	\$23,834,236	\$1,524,775	237,795	32.9

TABLE II. — NEW BUILDINGS CLASSIFIED ACCORDING TO TYPES OF SCHOOLS

Elementary schools	234
Elementary and junior high grades	100
Combined elementary and high schools	15
Junior high schools	63
Senior high schools (Three-year or four-year)	43
Five-year high schools	4
Six-year high schools	31
Total number of buildings	490

From Table I above it is interesting to note that the total investment made in Massachusetts school buildings and equipment since 1918 exceeds \$129,000,000 and that the total number of pupils accommodated exceeds 237,000, or nearly one third of our entire school population. In this connection it is also of interest to

*Returns were not received from Cambridge.

note that the valuation of all public school property in 1918 was about \$94,000,000. In 1933 this valuation had increased to \$398,000,000. A portion of this increase, perhaps one third, is chargeable to the depreciation of the dollar since 1918.

Table II shows that about three fourths of all the new buildings were built exclusively for elementary schools or for a combination of elementary and higher grades. It also reveals the prominent place that the junior high school has recently come to occupy as well as the important change that has taken place in the organization of the schools. Prior to 1915 nearly all towns and cities were following the 8-4 or 9-4 year-grade plan of organization whereby eight or nine years were assigned to elementary education and four years to secondary education. Since 1915 there has been a very striking movement in the direction of organizing schools on the so-called 6-6 or 6-3-3 plan whereby the first six years are assigned to elementary education and the second six years to secondary. In the larger towns and cities the six-year secondary period is usually divided into two divisions of equal length, the junior high and the senior high, and the pupils in each division occupy separate buildings. In towns of less population all secondary school pupils are usually housed in one building, and the school is organized either as a six-year high school or as a junior-senior high school. An analysis of Table II shows that 63 new junior high schools have been constructed, 31 new six-year high and junior-senior high schools, and 43 new senior high schools of the three-year or four-year type.

That all of these new accommodations for secondary school pupils have been urgently needed is made very clear by the phenomenal growth which has taken place in this department of our schools. In 1918 there were 166,453 pupils in the upper six grades, whereas in 1932 there were 318,841. In view of the inevitable effects of the National Industrial Recovery Act and of other contributory economic conditions, there is reason to believe that the construction of new buildings must be continued if we are to provide adequately for the education of our rapidly growing numbers of high school pupils.

Below is a table giving a list of new school buildings constructed in Massachusetts since 1918, with the location, name, type, and date of completion of each building.

SCHOOL BUILDINGS CONSTRUCTED IN MASSACHUSETTS

1918-1933

NOTE. — Under the name of each town and city which has engaged in schoolhouse construction since 1918 is given the following information:

- (1) Name of the building.
- (2) The general type of building — elementary, junior high, senior high.
- (3) The different grades housed in the building.
- (4) The date of construction.

Information concerning the first building mentioned in Acushnet should be read as follows: In Acushnet the Marie S. Howard Elementary School, housing grades 1-8, was constructed in 1919.

ACTON

Acton High (7-12) (1925)

ACUSHNET

Marie S. Howard Elementary (1-8) (1919)

Mason W. Burt Elementary (1-6) (1920)

ADAMS

C. T. Plunkett Junior High (7-9) (1924)

AGAWAM

Agawam Junior-Senior High (7-12) (1921)

Agawam Junior-Senior High Addition (7-12) (1928)

Plains Elementary, Addition (1-6) (1924)

North Agawam Elementary, Addition (1-6) (1925)

AMHERST

Amherst Junior High (7-8) (1930)

Cushman Elementary (1-6) (1927)

ANDOVER

Shawsheen Elementary (1-6) (1924)

ARLINGTON

Arlington High 2 Additions (10-12) (1931-32)
Junior High West (7-9) (1920-21)
Junior High West Addition (7-9) (1928-29)
Junior High East (7-9) (1927-28)
Pierce Elementary (1-6) (1923-24)
Pierce Elementary, Addition (1-6) (1929-30)
Cutter Elementary, Addition (1-6) (1924)
Hardy Elementary (1-6) (1925)
Parmenter Elementary (1-6) (1926)
Brackett Elementary (1-6) (1931)

ASHBURNHAM

Emeline Jewell Whitney Elementary, Addition (1-8)

ASHBY

Lyman Elementary and High, Addition (1-12) (1923)

ASHLAND

Ashland Elementary (1-8) (1929)

ATHOL

Sanders Street Elementary (1-2) (1919)
Sanders Street Elementary, Addition (3-4) (1922)
Silver Lake Elementary (1-3) (1920)
Silver Lake Elementary, Addition (4-6) (1922)
Lyman Ward Elementary (1-4) (1928)

ATTLEBORO

Lincoln Elementary (2-8) (1926)
Joseph Finberg Elementary (K-7) (1930)
Washington Elementary, Addition (1-6) (1920)
Charles E. Bliss Elementary, Addition (1-8) (1920)
Abiathar A. Richardson Elementary, Addition (K-7) (1925)

AUBURN

Julia Bancroft Elementary (4-8) (1927)
Mary D. Stone Elementary (3-8) (1929)
Pakachoag Elementary and Junior High (6-9) (1929)

AYER

Ayer Junior-Senior High (7-12) (1930-31)

BARNSTABLE

Barnstable High (9-12) (1924)
Barnstable Junior-Senior High Addition (7-12) (1929)
Tyanough Elementary (Special) (1923)
Hyannis Training Elementary, Addition (1-6) (1927)
Osterville Elementary, Renovated (1-6) (1929)

BEDFORD

Bedford Junior High (7-9) (1928)

BELCHERTOWN

Belchertown High (7-12) (1923)
Center Elementary (1-6) (1922)

BELLINGHAM

South Bellingham Elementary, Addition (1-8) (1920)

BELMONT

Belmont Junior High (7-9) (1925)
Belmont Junior High Addition (7-9) (1931)
Payson Park Elementary, Addition (K-6) (1927)
Chenery Elementary (K-6) (1924)
Kendall Elementary, Addition (K-6) (1930)
Daniel Butler Elementary, Additions (K-6) (1921) (1931)
Burbank Elementary (K-6) (1932)

BERKLEY

Berkley Elementary (1-8) (1926)

BEVERLY

Beverly High (9-12) (1925)
Charles S. Brown Elementary (1-7) (1922)

BILLERICA

Pinehurst Elementary (1-4) (1921)
Pinehurst Elementary (1-6) (1931)
Talbot Elementary, Addition (1-6) (1925)
Billerica High Addition (7-12) (1931)

BLANDFORD

Dean Memorial Elementary (1-8) (1923)

BOLTON

Emerson Memorial Elementary (1-6) (1922)

SPECIAL EDUCATION FOR ATYPICAL CHILDREN SURVEY

September, 1933

A survey was made in 1933 dealing with the education of children three or more years retarded in mental development, with the instruction of the physically handicapped in their homes, and the instruction of the deaf and of the hard-of-hearing in the public schools. This survey gives the cost per pupil of special instruction. For this reason the data are of considerable significance. The average cost per normal child in the public schools of Massachusetts for 1933 was \$90.40. The comparative cost of special education for the same period as shown by the following tables is not unduly high.

TEACHER-TRAINING

The State maintains a one-year course of specialized training at the Salem Teachers College, which, taken in conjunction with the three-year elementary course, leads to the degree of Bachelor of Science in Education. This course prepares teachers for teaching the mentally retarded children. There is a sufficient number of adequately trained teachers now available for all special class work in Massachusetts. In view of this fact, the summer course which has been maintained at the Hyannis Teachers College for several years was discontinued with the session of 1933.

Through the Division of University Extension, unit courses which are credited as a part of a year's work at Salem are offered to teachers who have been graduated from normal schools or teachers colleges and desire to earn their degree while in service.

SPECIAL CLASSES FOR CHILDREN THREE YEARS RETARDED IN MENTAL DEVELOPMENT

The survey of special classes made in 1930 showed that there were 551 classes in 124 cities and towns with a registration of 8,332 pupils.

The survey made in September, 1933, shows that there are now 554 classes in 133 cities and towns with a registration of 8,840 pupils.

In the period between 1930 and 1933, 47 special classes were closed and 50 new classes opened. In 28 towns and cities there was a decrease of 39 classes and in 8 towns where there was but one class in each town the work was abolished.

In some of the smaller towns the number of pupils has dropped below the required number of ten to make a class compulsory; consequently, some classes have been closed. In other communities new classes have been opened.

There was an increase of 33 in the number of classes in 17 towns and cities, and a new class was opened in each of 17 towns. The cities and towns which have increased the number of special classes since 1930 are: Boston, 6; Cambridge, 2; Leominster, 5; Worcester, 2; Lowell, Malden, Medford, Newton, Quincy and Revere 1 each; Greenfield, 2; Norwood, 5; Arlington, Amesbury, Ludlow, Weymouth and Winchester 1 each.

The towns which opened new classes are: Brookfield, East Bridgewater, East Brookfield, Freetown, Foxborough, Hadley, Longmeadow, Medfield, North Brookfield, Orange, Rockport, Seekonk, Sheffield, South Hadley, Southwick, Westwood and Williamstown.

¹ Discontinued in 1934.

EDUCATION OF PHYSICALLY HANDICAPPED CHILDREN IN THEIR HOMES

For several years, three or four cities, the first of which were Holyoke and Melrose, have employed a full-time teacher who gives instruction in the homes to those children who cannot go to school.

In 1930 the General Court passed a law requiring an annual census of crippled children. The law further provided that in every town or city where there were found to be five or more children so crippled that they could not attend school, a teacher should be employed by the local school department to instruct them in their homes.

In 1932 the Act of 1930 (Chapter 368) was amended by Chapter 159 so as to include all physically handicapped children unable to attend school. The context of the law follows:

"The school committee of every town shall annually ascertain, under regulations prescribed by the department and the commissioner of public welfare, the number of children of school age and resident therein who are physically handicapped. In any town where, at the beginning of any school year, there are five or more children so physically handicapped as to make attendance at a public school not feasible, and who are not otherwise provided for, the school committee shall, and in any town where there are less than five such children may, employ a teacher or teachers, on full or part time, who shall, with the approval in each case of the department and the said commissioner, offer instruction to said children in their homes or at such places and under such conditions as the committee may arrange."

A survey of the physically handicapped made by the Department in September, 1933, showed there were 39 cities and towns in the State maintaining home instruction — an increase of 17 communities over 1930. There were 93.6 visiting teachers in 1932-33 as compared with 15 in 1930, and the total membership in 1932-33 was more than double that of 1930. The 1932-33 membership was 598. The total cost of maintenance in the cities in 1932-33 was \$52,921.03 with an average cost per pupil of \$103.97. In the towns the total cost of maintenance was \$4,970.65 with an average cost of \$55.85 per pupil. The total maintenance cost for the State was \$57,891.68, the per pupil cost being \$100.33. The communities which have inaugurated home instruction since 1930 are: Pittsfield, Salem, Fitchburg, Revere, Brookline, Winthrop, Norwood, Saugus, Plymouth, Winchester, Needham, Swampscott, Grafton, Shrewsbury, Uxbridge, Sudbury, and Granville.

The following survey shows by localities the number of visiting teachers, the number of children receiving instruction, and the cost of maintenance.

LIP READING CLASSES FOR THE HARD-OF-HEARING
(In Public School System)
1932-1933

Year by year the teaching of lip reading to hard-of-hearing children is extended to increased numbers of persons.

The teacher goes from building to building meeting groups of children for designated periods. Often children from several smaller schools meet at centrally located buildings in certain parts of the city for these periods. Usually the work is offered twice a week in thirty to forty-five minute periods. It is believed, however, the shorter periods daily would be more desirable if sufficient teachers were available for this work.

We have large numbers of children who are hard-of-hearing and with whom the infirmity will become more acute with age. For such children lip reading is essential, and, in some cases speech correction, if they are to overcome their handicap in adult life. It is hoped that this work will become a part of the school programs in all of our cities and larger towns. Where a full-time teacher is not needed a teacher may be employed on a part-time basis. A movement is under way in several communities for two or three towns to employ a teacher jointly.

Lip Reading Classes for the Hard-of-Hearing

Summary

Number of children — 1,212

Number of teachers — 13 full-time; 6 part-time

Number of cities and towns offering:

1 period per week	8
1-2 periods per week	3
2 periods per week	6
3 periods per week	1

Number of cities and towns offering:

20 min. periods	1
30-45 min. periods	14
60 min. periods	5
90 min. periods (Boston)	1
120 min. periods (Boston)	1

The survey of 1930 showed that the audiometer was in use as a means of testing the hearing of children in 97 cities and towns. Since that time the use of the audiometer has been extended to a much larger number of communities. The present survey, however, does not determine the exact number of communities making use of this form of examination.

Lip reading classes for hard-of-hearing adults are still conducted in several of our cities and larger towns, including: Boston, Cambridge, Concord, New Bedford, Newton, Somerville, and Springfield. No survey was made in this particular field as a part of this study.

CLASSES AND SCHOOLS FOR THE DEAF

The law provides two methods for the instruction of deaf children. First, they may be placed in certain private schools. The State pays a tuition rate not exceeding the actual cost per child in the school and the Massachusetts Department of Education has the supervision of the instruction of these children. Second, the law authorizes the Department to establish day classes in not more than six cities. In these classes the State pays the instructional costs and transportation. The city furnishes a classroom, furniture, heat, and janitor service.

The oral method is used in all Massachusetts schools. It is the intention of the Department that, in general, the day classes shall confine their work to the first two or three grades, after which a pupil will be transferred to the Horace Mann School for the Deaf or to a boarding school.

Pupils from the Horace Mann School and the boarding schools often go to a high or trade school, there taking up the work with children of normal hearing. The Division of Vocational Education, through its Bureau of Rehabilitation, trains a limited number of pupils in trade education.

The Department places any deaf child, resident of Massachusetts, in one of these schools or classes. The parents, if financially able to do so, reimburse the Commonwealth for the cost of board in the boarding schools, in part or in full, not exceeding \$6 per week. Many families, however, are unable to pay anything. No one outside the office of the Department has knowledge as to who makes such payments.

Classes and Schools for the Deaf

SCHOOL OR CLASS	Teachers	Pupils Enrolled
Beverly School	12 ¹	83
Boston School	24 ¹	197
Clarke School	30 ¹	117
Day Classes:		
Horace Mann School	26	189
Lynn	2	18
New Bedford	1	12
Springfield	1	14
Worcester	2	23
Total	98	653

In the American School at West Hartford, Connecticut, 11 pupils are being educated at the expense of Massachusetts.

¹ Includes principal.

EDUCATION OF THE BLIND

The law provides for the placement of blind children in Perkins Institution and Massachusetts School for the Blind at a rate of tuition not exceeding the actual cost per pupil in the school. It also provides that the Department of Education shall supervise the instruction of such children.

The Department places any blind child, a resident of Massachusetts, in this school. The parents, if financially able to do so, reimburse the Commonwealth for the cost of board in part or in full, not exceeding \$6 per week. Many families, however, are unable to pay anything. No one outside the office of the Department has knowledge as to who makes such payments.

At the present time there are 177 pupils enrolled at Perkins Institution at the expense of the Commonwealth.

SIGHT-SAVING CLASSES

These classes are under the general supervision of the Division of the Blind. The State grants special aid to the extent of \$500 per class. It also provides suitable reading material for children in towns where no class exists.

PHYSICAL EDUCATION

This Bureau was established in 1922, following the passage of the Physical Education Law. In twelve years it has developed its policies through a carefully planned program which includes:

I. Consultation, Supervisory and other services:

1. Public Schools — Administrators
Supervisors
Teachers, Classroom and Special
2. Recreation Centers
Recreation Agencies
3. Other State Departments, particularly Public Health
State Institutions, particularly State Teachers Colleges
State Agencies, particularly County Extension Service

- II. Working contact with organizations interested educationally in schools and community:
 1. Parent-Teacher Associations
 2. Service Clubs
 3. Women's Clubs
- III. Co-operative relationship with private colleges and schools in the State.
- IV. Co-operative relationship with other private organizations:
 1. Massachusetts Tuberculosis Association
 2. Massachusetts Safety Council
 3. Massachusetts Society for Mental Hygiene
 4. Massachusetts Society for Social Hygiene
 5. Community Service of Boston, Incorporated
 6. New England Health Association
 7. Y. W. C. A.
 8. Y. M. C. A.
- V. Working affiliation with National Associations:
 1. American Physical Education Association
 2. National Recreation Association
 3. National Congress of Parents and Teachers
 4. National Amateur Athletic Federation — Women's Division
 5. National Education Association
- VI. Special Service:
 1. Civilian Conservation Camps
 2. Federal Emergency Relief Administration
 3. Civil Works Administration
- VII. The supervisor and the assistant this year have worked through these several agencies in the interest of continued and improved programs of physical education. In the course of the year the above program represents hundreds of contacts, consultations, surveys, speeches, articles and committee responsibilities.

The assistant has done three months resident field work in three large areas — Berkshire County, parts of Hampden, Hampshire and Franklin Counties, and Northern Worcester County. The service was intended for rural and village schools where the physical education is largely in the hands of the classroom teacher, supervised by the superintendent.

Recreation programs have been of major interest and concern in the light of a new social order which seems to point toward a very different work and leisure time relationship.

CONFERENCES AND INSTITUTES

Superintendents of Schools. — The Nineteenth Annual Conference of Superintendents of Schools was held at the Bridgewater State Teachers College on April 20-22, 1933.

The guests of the conference were Ernest C. Hartwell, Superintendent of Schools, Buffalo, New York, and William F. Russell, Dean, Teachers College, New York City. The subjects of Superintendent Hartwell's addresses were: "Taking Stock," "The Fixed Factors of the Problem," and "Economics Deserving Consideration." Dean Russell's addresses dealt with "Economics, Engineering, and Education" and "Liberty, Equality, and Fraternity in 1933."

Round Table conferences of specific groups of superintendents were held at which the addresses of Superintendent Hartwell and Dean Russell, together with other pressing problems in school administration, were discussed. A report of the Superintendents' Committee on "School Finance" was presented. Community singing was led by Frederick W. Archibald, Framingham State Teachers College.

On Friday morning a Memorial Service was held in memory of Arthur Clarke Boyden, late president, State Teachers College at Bridgewater, with Commissioner

Smith in the chair. Addresses were given by Frank W. Wright of the Department and John F. Scully, Superintendent of Schools, Brockton. A set of resolutions was presented by Allen P. Keith, Superintendent of Schools, New Bedford. Music was furnished by a quartette.

Junior and Senior High Schools. — The Twelfth Annual Conference of Principals of Junior and Senior High Schools was held at the Framingham State Teachers College on April 25–27, 1933. An all-day session on Wednesday, April 26, was held by the Massachusetts Association of Deans of Girls.

The principal addresses at the conference were as follows:

"A Program of Supervision for the High School" and "The Way Out," by Franklin W. Johnson, President, Colby College, Waterville, Maine.

"Issues in Secondary Education," "Special Functions of Secondary Education," and "A Co-operative Program," by Thomas H. Briggs, Professor of Education, Teachers College, Columbia University.

"Importance of Nutrition to the Adolescent," by George H. Bigelow, Commissioner of Public Health, Massachusetts.

"A New Outlook" and "Improving the Secondary School — the Dean's Share," by Maude P. Thayer, Dean, Westbrook Junior College, Portland, Maine.

"Echoes from the Meeting of the National Education Association at Minneapolis," by Maurice J. Lacey, Head Master, Jamaica Plain High School.

"A Preliminary Report of the Committee on Physiology and Hygiene in Secondary Schools," presented by Clair E. Turner, Professor of Biology and Public Health, Massachusetts Institute of Technology.

Music was furnished in the evening programs by the Principals' Quartet and the Chamber Music Orchestra, selected from All-Worcester High School Symphony, Arthur J. Dann, Conductor.

Elementary School Principals and Supervisors. — The Fifth State Conference for Principals and Supervisors of Elementary Schools was held at the Massachusetts State College, Amherst, March 22–24, 1933. The subjects that received chief emphasis and the speakers were as follows:

(1) "How Shall We Conceive the Educative Process?," "The Present Social Situation and Its Demands on Education," and "What Education Must Do to Meet the Social Demands," by Professor William H. Kilpatrick, Teachers College, Columbia University; (2) "The Creative Spirit and Education," by Rollo W. Brown, Author and Lecturer, Cambridge; (3) "Adjusting the Difficult Child in School," by Dr. Henry B. Elkind, Medical Director, Massachusetts Society for Mental Hygiene.

Other features of the program were: The showing of the Eastman Teaching Film, "Abraham Lincoln"; discussion groups on "Mental Hygiene in the Classroom," "Citizenship Training through the Activities of the School," "Constructive Economies in the Elementary School," "The Co-operative Group Plan," "How Does the Kindergarten Justify Itself?," and "The Rating of Pupils."

The total registration was 338, including 221 principals, 30 supervisors, and 87 others engaged in various types of educational work. Seventy-one cities and towns were represented.

Teachers' Institutes. — During the past year five institutes were conducted for the special benefit of teachers in the smaller towns of the Commonwealth. The speakers were largely members of the Department staff and of faculties of State Teachers Colleges. Among the subjects discussed were the following:

Our Everyday Experience with Art Education.

Good Schools in Bad Times.

Beauty in the Classroom.

Looking Forward.

The Rating of Pupils.

Individualized Instruction.

The Teacher and the Times.

Types of Teaching.

The location of these institutes, the number of teachers in attendance, and the number of towns represented are as follows:

Date	Location	P.D. 2.	
		Towns Represented	Number Present
Mar. 30,	Provincetown	10	73
Mar. 31,	Yarmouth	11	133
Sept. 22,	Great Barrington	22	178
Sept. 22,	Oak Bluffs	10	70
Oct. 6,	Topsfield	17	198
Totals		70	652

State Teachers College Instructors. — The Sixteenth Annual Conference of State Teachers College Instructors was held at Bridgewater on September 6-8, 1933. The guests of the conference were Dr. George F. Zook, United States Commissioner of Education; Dr. Franklin P. Johnson, President, Colby College, Waterville, Maine; and Dr. Henry B. Elkind, Medical Director, Massachusetts Society for Mental Hygiene.

Dr. Zook addressed the conference on "The Development of Teacher Training," and Dr. Elkind on the "Preliminary Report on Survey of Uses of Mental Hygiene in State Teachers Colleges." Dr. Johnson addressed the meeting on the subjects of "Character Education" and "The Way Out." Other addresses were as follows: "An Experimental Study of Marking Systems in Three State Teachers Colleges," by Harry F. Percival, Fitchburg, and "Some High Lights of Teacher Training in Europe," by President J. Asbury Pitman, Salem.

Departmental conferences on curriculum construction were held in various rooms and presided over by the several presidents of the colleges.

On Thursday evening an informal reception was given to President and Mrs. Zenos E. Scott of Bridgewater and President and Mrs. Albert G. Eldridge of North Adams, who had recently entered upon their new duties.

A "Half Hour of Music," under the direction of Frederick W. Archibald, Framingham, and the presentation of an exhibit, sponsored by the several Teachers Colleges, completed the program.

Art Supervisors and Teachers. — The Tenth Annual Conference of Supervisors and Teachers of Art was held at the Massachusetts School of Art, Boston, on January 27, 1933. The topic of the day was presented by Charles Edward Newell, State Director of Art Education and President of the Massachusetts School of Art.

The morning session of the conference consisted of addresses by the faculty of the Massachusetts School of Art as follows: "Color Analysis Based on the Five-Color Theory," by Anna M. Hathaway, and "Color Conclusions Based on the Six-Color Theory," by Fred J. Thompson. An address on "Color in Light" was also given by George L. Hall, The Hall Laboratories, Boston. A musical selection by James F. Kenney and an informal discussion of the subjects presented closed the session.

The afternoon session was held in the Massachusetts Institute of Technology Building, Cambridge, and consisted of an address on the "Physical Basis of Color," by Professor Arthur C. Hardy, Head, Department of Physics, Massachusetts Institute of Technology, followed by an informal discussion.

Special Class Teachers. — The conference at Great Barrington was held in connection with a teachers' institute, and the conference at Fall River was attended by the teachers of Bristol, Barnstable, and Plymouth Counties and was held in connection with the County Teachers' Convention.

At the conferences at Springfield, Worcester, and Boston, the principal address was given by Abraham Myerson, M.D., who discussed the problem child.

At all of the conferences, reports from the field, discussions, and papers were heard as given by teachers from the areas served by the conferences.

TEACHERS' REGISTRATION BUREAU

During the year 1932-1933, the Teachers' Registration Bureau enrolled 2,177 teachers, received notice of 216 vacancies, and placed 104 teachers, with an aggregate of \$110,865 in salaries for full-time teachers. The average salary of the positions filled, exclusive of substitute positions, was \$1,218.30 — a decrease of \$164.69 from the average salary of last year.

The number of new registrants having no experience was 1,637. These are classified as follows:

POSITIONS DESIRED		Women	Men
High school		456	472
Elementary school		118	—
Grammar and junior high school		127	10
Commercial		88	20
Household arts		84	—
Physical education		36	30
Manual training		—	17
Drawing		26	14
Music		30	13
Sewing		2	—
Kindergarten		89	—
Special class		3	—
Miscellaneous		—	2
Totals		1,059	578

The number of teachers placed by the Bureau from 1913 to 1933, together with the estimate of the aggregate salaries, is indicated in the following table:

	<i>Teachers Placed</i>					Totals
	1913-1929	1930	1931	1932	1933	
Superintendents of schools	22	—	—	—	—	22
High school principals	204	11	9	2	1	227
Elementary school principals	139	16	2	4	3	164
High school teachers	1,445	83	79	27	34	1,668
Elementary school teachers	2,869	134	98	38	31	3,170
Special teachers	1,094	50	56	35	22	1,257
Normal school teachers	39	—	—	1	—	40
Substitutes	253	23	19	16	13	324
Totals	6,065	317	263	123	104	6,872
Estimated aggregate salaries of teachers placed	\$6,457,965	\$426,085	\$338,800	\$147,980	\$110,865	\$7,481,695

CERTIFICATION OF SUPERINTENDENTS OF SCHOOLS

The Department of Education, as required by section 66 of chapter 71 of the General Laws, determines by examination or otherwise the qualifications of candidates for the position of superintendent of schools in a superintendency union.

In accordance with this provision of the law, the Department issues certificates of eligibility for such service. In 1933, nine term certificates were issued.

The classes and number of certificates issued by the Department since the law first went into effect are as follows: permanent certificates, 3; preliminary certificates, 133; term certificates, 226.

EDUCATION OF DEAF AND BLIND CHILDREN

Special Schools and Classes for Deaf and Blind

DIVISION OF IMMIGRATION AND AMERICANIZATION

On November 30, 1933, the Division of Immigration and Americanization completed its fourteenth year as successor to the Massachusetts Bureau of Immigration. Applications for service, numbering 25,809, were recorded at the various offices of the division for 1933. Of the total, slightly less than one half of the applicants, 12,396, called at the Boston office of the division. Assistance was sought by 13,413 persons at the five branch offices of the division, — 3,486 at Springfield, 2,916 at Fall River, 2,507 at Worcester, 2,450 at Lawrence, and 2,054 at New Bedford.

Inquiries concerning citizenship comprised approximately 66 per cent of the total; 17,136 persons sought information on that point or help in filling out applications for naturalization. Of the inquiries on naturalization, approximately 53 per cent or 9,053 came to the Boston office. The naturalization inquiries are recorded at the branch offices, — Springfield, 2,166; Worcester, 2,015; Lawrence, 1,815; Fall River, 1,132; and New Bedford, 955.

Fifty-six different nationalities are classified in the applications to the Division offices. Canadians were the most numerous clients, 6,233 of that group having been listed during the year. The national groups, including more than three hundred applicants per group, are Italian, 4,431; Irish, 2,921; Portuguese, 1,871; Polish, 1,694; English, 1,088; Hebrew, 757; Lithuanian, 513; Armenian, 509; Scotch, 501; Swedish, 495; Greek, 454; Newfoundlanders, 415; Syrian, 386; German, 344; and Russian, 342. Among the other nationalities seeking our help were Albanians, Austrians, Belgians, Bulgarians, Chinese, Czechoslovaks, Finnish, Lettish, Ruthenians, Spanish, Swiss, Ukrainians and Yugo-Slavs. In addition to these large groups of foreign-born inquirers, 1,551 Americans inquired about immigration problems in general or the individual problem of their foreign-born friends and neighbors.

DIVISION OF THE BLIND

During the year ending November 30, 1933, the Division of the Blind was in touch with 3,028 blind adults. Services were rendered as follows:

Assistance provided in the form of guides, clothing, vacation trips, shopping trips	1,298
Financial aid granted	998
Industrial aid in the form of guides, tools, or advertising	64
Assistance in the sale of products.	118
Employed by division on staff	13
Employed in workshops	124
Instruction by home teachers given	445
Visited, given information, hospital care, assistance	417

On November 30, 1933, there were 4,624 blind persons on the register, classified by ages as follows:

Under 5 years	38
Between 6 and 20 years	536
Between 21 and 50 years	1,330
Between 51 and 70 years	1,501
Over 70 years	993
Unknown	226

During the year 431 new cases were registered. Of these 64 were granted financial aid and 74 were instructed by home teachers. Others were visited and told of activities of the division.

There were 161 cases referred by the Massachusetts Eye and Ear Infirmary, of whom 143 were newly registered.

The causes of blindness in the 143 new cases registered were as follows:

Glaucoma	30	Disorganized globe	1
Toxic amblyopia	15	Myopia	11
Corneal opacities	8	Compound cataracts	3
Optic atrophy	17	Sympathetic ophthalmia	2
Separated retina	6	Retinitis	5
Blocked pupils	2	Chorio-retinitis	7

P.D. 2.			39
Retinal degeneration	4	Thrombosis	2
Retinal hemorrhage.	2	Panophthalmitis	1
Choroiditis	1	Phthisis bulbi	1
Retro bulbar neuritis	2	Dislocated lens	1
Retro bulbar lesion	1	Albinism	1
Pterygium	1	Uveitis	2
Nystagmus	1	Old iritis	1
Vitreous opacities	3	Hypopyon ulcer	1
Arterio sclerosis	1	Cause deferred.	4
Retinitis pigmentosa	6		

WORK FOR CHILDREN

We have given some form of service to more than 1,600 children during the past year. Some 1,150 visits to homes and schools have been made in the interest of these children. Parents and teachers appreciate the explanation and advice we have been able to offer regarding their visually handicapped children and almost without exception have worked with us in our efforts to conserve vision and prevent blindness.

During the year 262 children were newly registered at this office. Of these 141 are boys and 121 girls.

The children newly registered were reported from the following sources:

Massachusetts Eye & Ear In-		Private oculists	18
firmary	108	Perkins Institution	4
Schools	64	Relatives	3
Eye Clinics (excepting Eye &		Settlement Houses	2
Ear Infirmary)	40	Public Health Department	2
Division of Blind agents	21		

These children were distributed over the State, as follows:

Greater Boston	80	Within 100 miles of Boston	28
Within 25 miles of Boston	99	Over 100 miles	12
Within 50 miles of Boston	43		

The amount of vision of these children was recorded after careful eye examination and with glasses in all cases where glasses were advised. The amount of vision was:

Totally blind	14	20-50 and less	92
20-200 and less	63	Over 20-50	28
20-100 and less	57	Uncertain on account of age or	
		mentality	8

Diagnosis:

Myopia	73	Albinism	7
Hyperopia	55	Choroiditis and chorio retinitis	4
Nystagmus	29	Alternating strabismus	3
Optic nerve atrophy	23	Dislocation of crystalline lenses	3
Corneal opacities	21	Retinitis pigmentosa	3
Congenital cataracts	14	Retinal degeneration	2
Buphthalmos	7	Amblyopia	2

One case each of separation of retina, optic neuritis, conical corneae, esotropia, iridderemia.

In 11 children eye trouble is very complicated or the cause of blindness is uncertain.

The ages of these children were as follows:

5 years and under	40	11 to 15 years	59
6 to 10 years	151	Over 15 years	12

Practically every child reported has been visited — some of them several times. Eye and physical examinations have been arranged. Glasses have been supplied from private funds. Assistance has been given in educational plans. Cleartyped textbooks have been loaned. Fourteen talks on causes of blindness and our work have been given before groups of school and public health workers, churches, and clubs. This has facilitated co-operation.

During the year, 23 children were admitted to Perkins Institution, 151 to sight-saving classes, and 4 to the Boston Nursery for Blind Babies.

Last January, Brookline opened a sight-saving class. This is the 38th class in Massachusetts.

The Massachusetts Association for Promoting the Interests of the Adult Blind has given money to pay for glasses which lifted several children from the group of "blind" to that of "seriously defective eyesight." They have also assisted in clothing a child entering Perkins Institution, and at Christmas gave \$20 which was spent chiefly for mittens and sweaters for the children who were most in need.

We are also grateful to The Boston Committee for the Blind, The Worcester Association for the Blind, Mrs. Homer Gage, The Lend-a-Hand Society, certain oculists and opticians, and to others who have helped us in caring for our visually handicapped children.

EMPLOYMENT

The division made twenty-three placements during the year. Nineteen women were placed in housework, one man on a stand, and three men were placed as housemen. Two were returned to past factory positions.

Opportunities to sing and play were secured for five musicians.

Throughout the year many visits were made to factories and other places of employment in the search for possible positions.

Volunteer readers have been obtained for five college students.

There were placed in training at the Massachusetts Association Training School, seventeen men and boys and these pupils have earned over \$1,000 during the year.

New articles have been placed in the salesroom thus giving new consignors a chance to work.

PUBLICITY AND SALES

In addition to the salesrooms in Boston and Pittsfield, sales were held at women's clubs, church societies, in vacant stores and at private homes in the following cities and towns: Boston (Allston, Roxbury, West Roxbury), Cambridge (3), Fall River, Gloucester (East), Lynn, Malden, Newton, Pittsfield, Salem, Springfield. Acton, Amherst, Andover, Barnstable (Cotuit, Centerville, Hyannis), Belmont, Bourne (Buzzards Bay, Sagamore), Brookline, Cohasset, Dedham, Duxbury, Falmouth (Woods Hole), Groton, Harwich (Harwichport), Manchester, Marblehead, Middleton, Milton, Plymouth, Randolph, Swampscott, Wellesley, Wenham, Westborough, West Newbury, Weston, Winchendon, Winchester.

There were 25 speaking engagements to women's clubs, churches, teachers' associations, and lodges, explaining the work of the division.

WORKSHOPS

The Cambridge shop manufactured 8,871 dozen brooms, 5,417 dozen mops, and 161 rugs. The sales amounted to 8,767 dozen brooms, 5,204 dozen mops, and 161 rugs.

In the Woolson House Industries, 14 blind women were employed. They recaned 1,119 chairs for \$1,879.60 and produced hand loomed weavings valued at \$2,406.45.

In the Fall River shop, 11 men were employed. They manufactured 737 dozen brooms and recaned 930 chairs.

In the Lowell shop, 7 men resealed 1,441 chairs.

In the Pittsfield shop, 17 men were employed. They manufactured 1,299 dozen brooms and resealed 1,076 chairs.

In the Worcester shop, 8 men resealed 2,601 chairs.

HOME TEACHING

The seven home teachers gave 4,642 lessons and made 1,488 calls during the year. They traveled a total of 60,697 miles in their work.

The home teacher has a very close and intimate contact with the individuals and is not only a teacher but soon becomes a confidential friend and advisor.

The newly blinded person finds in the home teacher a most helpful and constructive refuge in readjusting himself to his new conditions.

RELIEF

Financial assistance was given to 998 adults. The total relief amounted to \$169,764.47.

The demand for financial aid has continued to increase perceptibly. The number of persons aided has been the largest ever. This condition is due to the continued unemployment and financial depression.

The amount of aid granted to 910 persons varied from \$5 to \$30 a month, as shown in the following analysis for one month:

\$30 a month	32	\$15-\$19	272
\$25-\$29	65	\$10-\$14	267
\$20-\$24	211	\$5-\$9	63

LOCAL CO-OPERATION

The Massachusetts Association for Promoting the Interests of the Adult Blind, The Boston Lions Club, local associations in Boston, Cambridge, Lowell, Lynn, and Worcester, and reading or sewing circles in Abington, Boston, Brockton, Cambridge, Fall River, Haverhill, Lawrence, Lowell, Lynn, New Bedford, Quincy, Rockland, Salem, Springfield, Taunton, and Worcester have continued to render valuable assistance to the division in promoting sales, arranging for hospital treatment, vacations, trips, loans, training facilities, assistance in securing employment, and promoting the happiness of the older groups through friendly visiting and social gatherings.

DIVISION OF PUBLIC LIBRARIES

SUMMARY OF WORK DONE

Libraries visited, advised on library economy, reorganized, etc.	145
Days spent in field work	532
Small libraries given children's books and periodicals	77
Addresses made by the staff	22
Meetings attended	35
Library positions filled (5 temporary only)	8
Lending libraries: Volumes loaned (increase of 10 per cent)	19,511
"General" 9,738 volumes to 292 libraries (gain of 36 libraries)	
"Foreign" 9,773 volumes in 29 languages to 150 libraries (gain of 12 libraries)	
Libraries using State certificate reading (gain of 10)	170

FIELD WORK

The Public Libraries

The table of statistics given above deals only with tangibles. The intangible results of the reorganization and follow-up work of the field adviser and her assistants are not to be reckoned by figures or in terms of dollars and cents, but they are none the less real. Among them may be mentioned awakened pride in their libraries by the whole community and determination not to let them lapse again; renewed enthusiasm in reading, resulting in increased circulation handled more easily; advantage taken of the lending library of the Division of Public Libraries to supplement their own necessarily small collection in books on current problems; eagerness on the part of the children to read fresh, clean books arranged for their convenience, with further stimulation of story hours and the award of certificates for reading from the State lists; much better co-operation between the library and the schools.

Visits from the field adviser bring about a thorough survey of existing conditions and possible improvements. The space gained by discarding out-moded books of no historical or monetary value usually makes possible an entire rearrangement of the library. The revision of the catalog and the mending and cleaning of the book collection bring again into circulation many of the interesting older books which have been forgotten. Help in the selection of more recent books freshens the whole collection. The experiment of intensive supervision of groups of small libraries by personal follow-up work is proving most successful, especially in showing the untrained librarian how to meet her various problems as they arise.

In conferring with trustees and librarians at the annual institutes, stress is being laid on the library standards drawn up by the division. The analysis of the work of the various libraries as embodied in these standards and the recommendations contained therein have in many cases resulted in increased appropriations and extension of service as well as in a more efficient handling of everyday library problems.

The Schools

Advisory service in book selection and arrangement and in meeting the demands of teachers and pupils has been continued. The annual conference of Teachers College librarians was held at Bridgewater. A report of the Committee on a Library Course of Study was presented, followed by a discussion which will be continued at the next meeting.

The story hours which were so popular last year were again made possible by the generosity of the Massachusetts Library Aid Association. Fifty-two in seventeen towns is the record. As before, Mr. and Mrs. Cronan told the stories to most enthusiastic groups of children and, as before, there followed in every case eager demands for the books mentioned. In many instances deposits of books were asked for and obtained by outlying schools. In at least one town the children were too absorbed

by the stories to heed the honk of the school bus, preferring to walk home rather than lose a bit. It is worth reporting that the first request for stories this year came from a club of high school girls in a town where the story hours had been given in 1932 to the junior but not to the senior high school pupils. So enthusiastic were the juniors that this club of older girls wrote a letter to the Division of Public Libraries asking if it would be possible for the Cronans to come again and tell stories to them. Of course it was arranged, and so the second year started.

These regular story hours were given to grades four to eight inclusive in each town, but a brief visit was made by the Cronans to the first three grades also. In several towns members of the school committee and library trustees joined the children at these story hours. The results were an awakened interest in schools and libraries of which the following incident is typical. The division was asked to send a speaker to a teachers' institute in a superintendency union where story hours had been given. This contact furnished an opportunity to stimulate good reading and foster closer co-operation between the school and the library. A majority of the teachers in this union have since visited their local libraries — many for the first time. Every library in this union has been put in first-class condition by field workers of the division, new books have been purchased, hours adjusted to meet the school needs, books repaired and bound, certificate reading books plainly marked for each grade. As in all small towns, collections of State certificate books have been lent on request to supplement the supply of the library.

The certificate reading tends to increase the popularity as teachers and superintendents become aware of its value in promoting a taste for good reading among the school children. Because of greatly reduced appropriations many public libraries were unable to replace old collections or buy new ones and the children would have fared badly had not The Library Committee again come to the rescue with a gift of \$100 from the Sohier Book Fund. This enabled the Division of Public Libraries to add enough extra copies to their certificate lending collection to supply all demands. The 170 libraries using these lists include 159 towns, 6 institutions, 3 State Teachers Colleges, and 2 continuation schools.

Institutions

Four more State institutions have asked advice and help from the division in building up their book collections into organized libraries. These are Danvers State Hospital, Bridgewater State Farm, Westfield State Sanatorium, and the Lyman School at Westborough. In all of them the collections were weeded, what was left rearranged, lists of new books for purchase made out, gifts of old books solicited, and instruction given in cataloging, classification, and mending. At Westfield the work was under the direction of the Westfield Atheneum.

There are now nineteen institutions (18 State and 1 County) which depend more or less on follow-up help from the division. To thirteen of these institutions books have been lent the past year for the use of staff or inmates or both. The State Prison Colony at Norfolk alone has borrowed 236 books. An informal gathering of these institution librarians was held in November in the very attractive new library room at Norfolk State Prison Colony. Eleven institutions were represented by 22 persons.

LENDING LIBRARIES

Here again, the mere figures — "19,511 books lent to 292 libraries, a gain of 36 libraries" — give no conception of the story back of them. It is really a continuation of the story of 1932, — a story of the unemployed flocking to the public libraries and taxing all their resources to the utmost. Even had the libraries been able to give normal service the onslaught would have been tremendous, but with sadly depleted book stocks, greatly decreased book appropriations (more than one of our public libraries had not one cent to spend for books in 1933), and no more assistants than in former years, the struggle to supply new books and the kind of books asked for would have been well nigh hopeless but for the lending collection of the division.

An analysis of the 645 volumes purchased, indicative of the nature of requests, shows a large proportion of books on trades and mechanics, current economic problems, education, and what might be called the conduct of life. Here are a few

representative requests: Illustrating and advertising; the function of a Board of Health; meat inspection and the diseases of animals; how to read a barometer in navigating; a book on drafting; the origin and source of the phrase "wet the rope"; several requests for laying out golf courses; how to construct a fireplace; plans for small boat building (several of these); the co-operative dairy movement; the management of hot-houses; several on forestry; on colonial churches, especially the paneling used; how to clean a near-marble bust; the care of pets.

As has been intimated, many of the books wanted were borrowed by the division from the larger libraries on inter-library loan. To the public libraries which have lent so generously to their smaller neighbors thanks are again extended. Particular mention should be made of the "special" libraries which provided books not otherwise obtainable: the State Library, the Massachusetts Institute of Technology, the Congregational, Historical, and Boston Medical Societies, the State Departments of Public Health, Corrections, and Agriculture; and the Boston Athenaeum, which, though not lending, never yet has failed to trace the most puzzling quotation or ambiguous reference question.

THE LIBRARY INSTITUTE

This institute, omitted in 1932 for the first time in sixteen years for lack of funds, was made possible in 1933 through the bequest of Miss Elizabeth P. Sohler to the Free Public Library Commissioners in 1927. The institute was held at the Hyannis State Teachers College. Only librarians and trustees from the very small towns were invited or present. Special emphasis was placed this year on the daily problems of the village libraries and how best to meet them. The records show 66 registered from 47 towns, ranging from the Cape to Berkshire County; 18 of those present were new librarians, recently appointed and untrained.

EXHIBITS

The following exhibits were prepared: Posters and books representing the work of the division for the State Federation of Women's Clubs at Swampscott; posters on hospital libraries for the Kansas Conference of Social Work; and books and posters for the Occupational Therapy Conference in Boston.

With a few exceptions the talks were on books or on the possibilities of public or institution library service to their communities.

TEACHERS' RETIREMENT BOARD

The active membership of the Retirement Association again decreased during the year 1933. It is the second year that there has been a decrease in the membership of the Retirement Association. From the time the Retirement System was established through 1931, the membership increased each year and on December 31, 1931, there were 20,213 active members. On December 31, 1932, the membership decreased to 19,998 and on December 31, 1933, there were 19,799 active members, 15,767 of whom were teachers who entered the service for the first time since 1914 and were required to join the Retirement Association, and 4,032 were teachers who served in the public schools of Massachusetts prior to July 1, 1914, and voluntarily joined. During the year 1933 there were only 705 teachers who entered the service of the public schools of Massachusetts for the first time who were enrolled as members of the Association. This is less than one half the number of new teachers enrolled for the year 1931.

For the first time since the Retirement System was established, the deposits received from the members of the year decreased, the deposits for the year 1933 amounting to \$1,769,508.72, or \$60,198.16 less than the deposits received in 1932. Refunds amounting to \$421,196.48 were made on account of members who left the service of the public schools of Massachusetts. Of this amount, \$346,883.89 was contributions and the balance, \$74,312.59, was interest. Payments for the year amounting to \$119,240.54 were made to the estates of deceased members. Since the Retirement System was established, \$5,125,845.24 has been paid on account of members who have left the service and \$766,400.79 has been paid to the estates of deceased members.

The income over disbursements amounted to \$1,883,072.94 and the gross assets have increased to \$22,199,438.97. The total liabilities amount to \$21,953,513.64, leaving a surplus of \$245,925.33.

On account of the financial conditions which existed during 1933, there was interest due the Retirement Fund and unpaid on December 31, amounting to \$41,815.00 as follows:

	Par Value	Interest Due and Unpaid
Atlantic City, N. J.	\$140,000	\$6,180
Detroit, Mich.	724,000	32,350
Flint, Mich.	113,000	595
Pontiac, Mich.	28,000	2,690
	<u>\$1,005,000</u>	<u>\$41,815</u>

Interest at the rate of 4 per cent was credited to the accounts of the members on December 31, 1933. The total interest credited for the year to the members' accounts and the annuity reserve fund amounted to \$823,588.54.

Two hundred three teachers retired during the year 1933, their annual retiring allowances amounting to \$174,107.08. Of this amount, \$38,965.12 was annuity derived from the contributions made by these members before retirement and the balance was pension paid from State appropriations. The retirements for the year were as follows: On account of disability before attaining the age of sixty, 9; voluntary retirements, ages sixty to sixty-nine, 137; compulsory retirements at age seventy, 57.

The following table gives statistics relating to the 203 members retired in 1933:

Retirements	Number of Retirements	Average Age at Retirement	Average Length of Service	Average Salary Last 5 Years	Average Annuity	Average Pension	Average Retiring Allowance
Before age 60 on account of disability	9	56.33	32.04	\$1,698 07	\$119 11	\$375 78	\$494 89
At age 60 or over, without credit for prior service*	7	67.14	12.70	2,005 60	155 06	159 39	314 45
At age 60 or over, with credit for prior service*	187	65.93	39.12	1,893 53	196 83	698 63	895 46

* Teachers who served in Massachusetts prior to July 1, 1914, who have at the time of retirement 15 years of service in this State, the last 5 of which are continuous, receive a pension from the State based on their total service in Massachusetts.

Of the 187 teachers retired during the year at the age of sixty or over with credit allowance for service prior to July 1, 1914, 97 received the maximum pension payable under the retirement law and only 1 received the minimum pension. Seven of these 187 teachers had served in the public schools of Massachusetts for fifty years or more.

On December 31, 1933, there were 1,485 retired members living who retired at the age of sixty or over and the average retiring allowance for these members was \$741.30. There were also 87 retired members living who were retired on account of disability before age sixty. The average retiring allowance for these members was \$385.96. There were, therefore, 1,572 retired members living on December 31, 1933, their retiring allowances amounting to \$1,134,411.44 of which \$940,456.04 is pension paid from State appropriations and \$193,955.40 is annuity.

There are 1,428 members of the Retirement Association who during 1934 will be eligible to retire at the age of sixty or over, of whom 43 will be required to retire at the compulsory age of seventy.

The rate of assessment for the school year beginning July 1, 1933, was fixed at 5 per cent of the annual salary of each member, subject to the provision of the law which requires that the minimum annual assessment shall be \$35 and the maximum annual assessment \$100. Notice has been given by the Board of its intention to continue this rate for the school year beginning July 1, 1934.

The Teachers' Retirement Board has estimated that it will be necessary that the State appropriate the following amounts for the fiscal year ending November 30, 1934:

Pensions to retired members and to make good any deficit in the annuity fund	\$1,008,000 00
Reimbursement of cities and towns on account of pensions paid under local systems	246,962 72
Administration expenses	16,705 00
	<hr/>
	\$1,271,667 72

MASSACHUSETTS NAUTICAL SCHOOL

The Massachusetts Nautical School is unique among the educational activities of the State. Its classes are held on the decks of a former naval vessel. The course of study continues throughout the year, there being two entering classes and two graduations a year. The school provides a technical education, and the annual practice cruise establishes contact and experience with foreign ports. The school is doing its part in maintaining the fine traditions of Massachusetts on the sea.

Instruction is given in Seamanship and Marine Engineering; and the school, established in 1891, provides for the needs of the young men of the State who desire to prepare for a seafaring life.

The course of study occupies two years. The age limit of applicants is from seventeen to the twentieth birthday. All applicants, together with their parents, must be residents of Massachusetts. Admission to the school is by competitive examination, the entrance examinations being held in March and in September.

The first year deposits amount to \$300, and the second year deposits to \$150. During the winter term, from October to May, the ship is berthed at the Navy Yard, Charlestown. During the summer term, from May until October, the ship is cruising in European waters.

On March 23, 1933, the United States Shipping Board passed the following resolution: The United States Shipping Board in the interest of an efficiently manned American merchant marine hereby declares that, as a matter of policy, it endorses the maintenance of schools for nautical education by the respective States, and urges the continuance of the present State nautical schools; and will take whatever action is within its power to encourage other State educational systems to adopt some form of nautical instruction in their schools.

THE WORK OF THE YEAR

Through the courtesy of Rear Admiral Louis M. Nulton, U.S.N., and his successor, Rear Admiral Henry H. Hough, U.S.N., Commandants of the First Naval District, the ship was berthed during the winter term at the Navy Yard, Charlestown, and space in one of the buildings in the Yard has been assigned to the school for classrooms.

In January, the tuition fee was increased from \$60 to \$100 per year, applicable to all cadets who had not completed their payments for tuition.

During the spring overhaul, the Navy Department made repairs to the *Nantucket* amounting to \$22,476, and supplied the school with a range finder and a direction finder.

While the annual practice cruise covered the usual period of time, fewer ports were visited and the mileage was reduced about fifteen per cent. During the cruise 3,326 miles were made under sail alone. Although occasionally rough weather was encountered, the weather on the whole was favorable. The extensive mileage under sail alone afforded exceptional opportunity for practical seamanship, and reduced the consumption of coal.

Information received at this time regarding the graduates of the year 1933, shows that eighty per cent of them are employed at sea.

The Commissioners have on previous occasions emphasized the advantages of training young men in a vessel equipped with both sail and steam power. The seamanship and training thus acquired is far more comprehensive and valuable than could be obtained in a steam vessel of a commercial type. In this connection, it is interesting to note that, in July of this year, the new English training ship *Arethusa* was opened for service with impressive ceremonies at which Prince George was the principal figure. The *Arethusa* is a four-masted bark, formerly called the *Peking*, and this indicates the opinion of the British Government as to the value of training in sailing vessels even though the future career of these young officers may be entirely in steam vessels.

THE BRADFORD DURFEE TEXTILE SCHOOL

The enrolment in the day classes for the school year 1932-1933 was 138. In the evening classes 1,633 applications were received and 931 were enrolled, no student having his name placed upon the register until he had been in attendance at least three evenings.

The school graduated, at the close of the last school year, 37 from the day classes and 321 from the evening classes. Of the evening graduates, 26 were of diploma grade and 295 were granted certificates.

The Bradford Durfee Textile School is primarily a school for instruction in textile and closely related subjects. The school further restricts its courses to the cotton branch of the textile industry. These courses are offered in both day and evening classes. Students in the day classes are drawn largely from graduates of high schools who are looking forward to future occupation in the textile industry and wish to obtain such ground work as will aid them in their progress in the industry.

Students in the evening classes are drawn mostly from those working in the industry and who wish to perfect their knowledge of some particular branch. It is very evident that changes in the industry itself will have a very direct influence upon the different activities of the school, as, particularly in recent years when changes have been somewhat rapid, these influences have been felt.

Possibly no more striking illustration of this has been experienced than was experienced this past year, when the mills, after adopting the textile code, commenced operating on two shifts of forty hours each. The introduction of a morning shift and an evening shift meant that those working on the evening shift, although their hours of leisure had been increased, yet were denied the benefit of evening classes.

The school recognized this new opportunity and organized special morning classes for these men wherever it was found possible to do so without interfering with the work of the regular day classes. Up to the present time, there have been eleven different courses offered in these morning periods and the response has shown that the need existed. This is an entirely new departure from anything previously undertaken by the school and was brought about solely by the changes in industry.

LOWELL TEXTILE INSTITUTE

The policies governing the curricula of the various courses of the day school remain the same as during the past few years. The value of courses in marketing and subjects which treat of the distribution of goods appears more and more evident in the light of present-day problems of industry. The basic subjects which pertain to production and manufacturing still form an important part of all engineering and manufacturing courses.

Because of the necessary curtailment in the amount of our budget, no extensive additions or replacements in equipment have been made. A small amount of apparatus for testing and laboratory instruction has been added to strengthen the classroom instruction. A few of the machinery manufacturers have made additions or replacements.

With the revival of business and manufacturing, inquiries for graduates have increased. This activity will tend to re-employ those who have become idle because of closed mills and will help to open positions for those who have recently graduated.

The registration of day students for this year has shown a slight increase. There are 176 students this year compared with 167 last year. In June, 1933, 19 were graduated. Of this number, 16 received degrees upon completion of the four-year courses and 3 received diplomas upon completion of the three-year courses.

The evening classes for the year beginning October, 1933, show an unusual increase. The registration of 1,071 is the largest in the history of the evening classes and compares with 801 of last year. This increase is shown in nearly all of the twenty-seven different courses. Notable increases are in classes of textile design, worsted yarns, and power weaving. The facilities of the chemistry department have been severely taxed during the past five or six years and there is no diminution this year. Evening classes in elementary chemistry are larger than the laboratory can properly accommodate and many students are compelled to share desk compartments with others.

Last year there was a demand for courses in English in the evening school. This was answered by offering a course in rhetoric which included theme writing and business English with grammatical constructions. This proved to be popular as is shown by an increase from 16 students last year to 96 this year.

The increase in the number of students, particularly in the chemistry department, makes the need of an addition to the Colonial Avenue building a growing necessity. The available room and equipment offer a serious handicap to the students in the present courses and prevent further extensions which would broaden the courses now offered.

NEW BEDFORD TEXTILE SCHOOL

The New Bedford Textile School, during the past year, has continued along the same general lines as in previous years, no new courses having been added. Minor changes have been made in the different courses to conform to the changes which are continually being made in the methods used in the textile industry. This is especially so in the handling of rayon.

Considerably more interest is being shown in the general cotton manufacturing course, carding and spinning department. In this department, especial attention has been given to long drafting and spun rayon.

Weaving and Designing Departments. — In these departments there is still an increasing call for instruction on Leno, Automatic Box Loom, and practically all kinds of fancy weaving. In the Jacquard section, arrangements have been made so that a much larger range of patterns can be made. The weaving classes are the most popular of the evening courses.

Knitting Department. — The knitting department continues to co-operate with the manufacturers in trying out new methods of manufacturing and new combinations of fibers; also in all kinds of textile testing.

Chemistry Department. — The work in the chemistry department has been followed along the same general lines, special study being made of qualitative analysis, and also quantitative degree of mercerization.

Mechanical Department. — The same methods of instruction have been followed as in previous years; also the practice of designing and building some machine tool each year. During the past year a back geared screw cutting bench lathe has been built.

STATISTICS OF ATTENDANCE AND GRADUATION, 1932-33

Day students registered, 163; attending, 138. Evening students registered, 1,065; attending, 875. Graduated, June, 1933, — day students, 34; evening students, 147.

CLASSIFICATION OF STUDENTS BY COURSES

Day students: General cotton manufacturing course, 17; designing course, 10; chemistry, dyeing and finishing course, 56; knitting course, 2; mechanical course, 35; junior manufacturing course, 3; secretarial course, 5; mid-year entering class, 4; courses in special subjects, 6.

Evening students: Carding and spinning, 73; weaving and warp preparation department, 336; designing, 61; knitting department, 28; mechanical department, 301; chemistry, dyeing and finishing, 76.

DIVISION OF VOCATIONAL EDUCATION AGRICULTURAL EDUCATION

From statistical data in previous reports of the Division of Vocational Education, and from citations of statements made by competent authorities, it has been evident that Massachusetts is a promising locality for profitable farming and, consequently, for vocational agricultural education. In the past year there has been but little basic change in our general agricultural situation.

Poultry keeping shows a healthy growth. Dairying is expected to resume a strong place as soon as agencies for co-ordination and co-operation at work on problems of production, transportation, and distribution complete their labors.

Readers of this report may well review the statements made by President Edward H. Thomson of the Federal Farm Land Bank of Springfield, Massachusetts, at a Regional Conference on Vocational Agricultural Education held in Boston, and quoted, in substance, with his approval, in the report of the division for 1930-1931. He has just authorized their re-affirmation in this report. With loans to farmers in this State, aggregating about five million dollars, losses due to failure and foreclosure have been practically negligible, "considerably less than one per cent." He continues to be "fairly optimistic" about farming here. He still thinks we should press forward our advantage, due to our retail market location, on all our fronts. This marketing advantage is ours by our propinquity, and should be held by our enterprise and our intelligence. Vocational agricultural education in Massachusetts is an important means to this end.

The service of the division has again figured prominently in national competition. A senior in the Essex County Agricultural School, Alfred J. Cipolla, won the first prize of \$125 offered by Swift and Company of Chicago, in an essay contest on a food production and distribution theme. A senior in the Reading High School agricultural department, Albert W. Richardson, won the Regional Public Speaking Contest in which representatives from ten states participated at Eastern States Exposition in Springfield, Massachusetts, and placed first at Kansas City, Missouri, November 20, in the national contest sponsored by the national organization of more than 60,000 farm boys studying vocational agriculture, known as the Future Farmers of America. This latter placing carried with it a free trip to Kansas City and a cash prize of \$300. His subject was most timely: "Why be a Farmer?" Participation in such contests adds interest and zest to activities in our program which are aimed at developing powers of expression sorely needed by those who intend to follow agricultural careers.

In the Regional Vocational Agricultural Judging Contests held at Eastern States Exposition in September, teams representing the State placed as follows: Second, judging poultry, with Harold Glover of Norfolk County Agricultural School ranking second individual and Thomas Swiniarski of Essex County Agricultural School, fifth; and Third, judging dairy cattle, with Arthur Bisko of Hadley Agricultural Department ranking third individual and Ralph B. Nourse of Worcester Agricultural Department, ninth.

The supervisor of agricultural education assisted in another survey of graduates, suggested for consideration by directors and instructors in charge of agricultural schools and departments, and recommended one for public recognition by the State Department of Agriculture. A certificate of merit, appropriately designed, signed by the Commissioner of Agriculture, and endorsed by the Supervisor of Agricultural Education, was awarded this candidate "*For Creditable Accomplishment in Fruit Growing*," at the banquet given in connection with the Fifteenth Union Agricultural Meeting held in Worcester in January. About thirty agricultural organizations have parts in these annual meetings staged by the Department of Agriculture. The young farmer so honored was Archer L. Pierce, a graduate of Essex County Agricultural School. Annual awards like this are high honors and year by year add to the prestige of the work.

Assistance by directors and instructors in public welfare gardening projects has again been encouraged. Most notable, perhaps, of the achievements of this kind, have been those in Lawrence and Salem, with the Essex County Agricultural School helping; Westfield and Falmouth, with the agricultural departments helping; and Walpole, with the help of Norfolk County Agricultural School. There were

incidental services of this kind given *gratis* by most of our vocational agricultural schools and departments.

Earnings of the boys under our "Earning and Learning" watchwords, while still in school, have continued to grow since reliable project and other supervised farm practice accounting began, until they have now crossed the high mark of three and a half million dollars. Detailed figures for the past year will be found in the statistical table (No. 5) presented on later pages of this report.

With times financially out of joint, it is difficult to hold everything to a true perspective. In general, in the interests of both economy and efficiency, we still have the need of contriving more and more effective teamwork programs among Smith-Hughes and Smith-Lever workers. Success so far encourages us to hold on and work on toward co-operative service perfectly balanced and adjusted.

PRE-EMPLOYMENT TEACHER-TRAINING AND TRAINING TEACHERS IN SERVICE

Pre-Employment Teacher-Training. — During the school year 1932-33, the continued slight demand for teachers in agricultural schools and departments as noted in two previous years has had the cumulative effects to be expected. Fewer undergraduates have sought the vocational teacher-training since there was no promise of employment, but the few men enrolled have been very serious and have done better work than usual.

At Massachusetts State College, the smaller number of candidates has included graduate students and some of the better prepared upper-classmen. The new "major" curriculum plan has provided a better balance of subjects. Readjustments were made leading to the two-semester year in place of three terms. Courses in vocational teacher-training (with numbers changed) retain their former weight. This change was effective for graduates during 1932-1933, and for all others in September, 1933.

There was only one regular apprentice during the year and this man was promptly placed in the first regular vacancy in his field. The continued lack of opportunities for apprentices due to the depression has increased the necessity of practical activities in the college courses.

State Supervisor Rufus W. Stimson assisted during one course, and Supervisor of Teacher-Training Franklin E. Heald participated in each of the undergraduate courses, bringing current field problems to supplement other work.

Since there were no employed teachers of agriculture with teacher-training conditions, and since no vacancies were expected to require new candidates, *no summer school* courses for vocational teacher-training were offered in 1933. The College summer school remained on the same basis as the previous year, co-operating with the University Extension Division.

Training Teachers in Service. — The men in service who had been appointed with any conditions regarding teacher-training met this requirement in the summer of 1932, thus removing the necessity of special service on the elementary phases of this work during the current school year. This made it possible to give more service to experienced men both in dealing with the readjustment problems of the present economic situation, and in conducting graduate courses in teacher-training fields of special value to them.

The itinerant service for all employed teachers was continued as usual with the number of visits somewhat limited to reduce travel expense. The newer teachers and those who encountered special difficulties were as usual given more attention. Professor W. S. Welles co-operated in this service.

At the request of some of the more experienced teachers, a graduate course in advanced problems in vocational education was organized. These men met at Amherst at intervals throughout the year, setting up programs of work to be done in their regular classes at school. The man's own classroom became the laboratory for improvement of method. Visits were made to those classrooms for further assistance to the men. The values in this type of work appeared so great that other instructors are asking for a similar privilege. This semi-research course is adapted only to teachers of considerable experience.

Professional Improvement. — Each teacher in service has carried out the professional improvement program and, with few exceptions, the programs have been of a better quality than ever before. This is continued evidence of the fact that

employed teachers are more anxious to improve their qualifications in the present unemployment crisis.

The twenty-second annual summer conference was conducted at the Bristol County Agricultural School, August 7 to 9, 1933, and practically every instructor in the entire service was present throughout nearly the whole period. The current economic problems which the farmer faces were given primary consideration during the conference. Helpful addresses were given by Director Robert O. Small, James Forbes, Director of the Newton Trade School, Superintendent A. P. Keith of New Bedford, Lester F. Allen of Fall River, and others. The number of sectional round table meetings for the consideration of special problems of small groups was increased and gave general satisfaction.

However, the larger amount of individual service through personal letters and constructive helps from the office were given during this period. This service from the office as well as during visits appears to be the most fruitful of results of all of the teacher-training service.

During the school year 1932-1933, the agricultural supervisors made 152 visits to agricultural schools and departments, and 285 visits to individual teachers. One hundred eleven visits were made to render special service to teachers.

TRADE AND INDUSTRIAL EDUCATION

BOYS AND MEN

Day Schools

The day vocational schools continue to show an increase in enrolment and in the number who graduated over the previous year. There were 953 graduates from the day industrial and part-time co-operative schools for the school year 1931-1932, — an increase of 10 per cent over the year 1930-1931.

The demand for training far exceeds the capacity of most of the day schools. Waiting lists are established, though this has not proved very helpful during the past year, since so few have been able to get work and have remained in school.

The continued industrial depression has made it very difficult for boys who have graduated from high school to secure work; many of these high school graduates have come into the trade schools for training which they feel will enable them to get work.

The survey of the industries of the city of Springfield has not yet been fully completed. The Department is still co-operating with Springfield in the completion of this work.

While there has been a measure of restriction of available funds in nearly all cities and towns, necessitating considerable economy, no day school has been closed.

The Newton Trade School has more adequate quarters procured through the renting of a large garage in the down town section of Newtonville. The Somerville Vocational School hopes to get a new building started within the year; the Weymouth Vocational School expects to have a new building 80 x 60 feet for its automobile repair department.

One new department was organized in automobile repair with one teacher at the Cole Trade School (Day), Southbridge; the carpentry department at the Weymouth Vocational School has been re-organized as cabinet making.

The cabinet making department in the Somerville Vocational School was discontinued at the close of the school year.

The summer school of the Worcester Boys' Trade School was conducted for only three weeks as a matter of economy.

Part-time Co-operative and Apprenticeship Schools

The part-time co-operative schools have all experienced great difficulty in placing boys in industry due to the scarcity of jobs. One school, the Weymouth Part-time Co-operative School, was discontinued January 1, 1933. The Boston Co-operative Schools, with a few notable exceptions, have been unable to place any boys below the fifth year.

There is hope that the coming year will see this very difficult condition improved.

A new department in automobile repair was established in the Cole Trade School. The part-time apprenticeship class in sheet metal work, established for sheet metal apprentices in Boston, is being continued this year. It is planned to conduct this work Saturday mornings for twenty-five weeks.

Evening Schools

The evening industrial schools have felt the retrenchment in available funds as well as the day schools. The effect of this retrenchment was a shortened program in a few instances and a discontinuance entirely in others.

Two new courses were established; nine courses were re-established; four schools were discontinued for the year; and twelve courses were discontinued in schools for lack of adequate enrolment or for economy.

The department and the course established were: Airplane service at Boston, and the Marine Engine Department at New Bedford.

The departments and courses re-established were: Carpentry at Boston; automobile repair, electricity, plumbing, printing, and machine at Beverly; sheet metal at Worcester; alternating current mathematics and machines, and mathematics and drawing for carpenters at New Bedford.

Schools were re-established in Chicopee and Everett.

The schools discontinued were: Cambridge, Holyoke, Southbridge and Westfield.

PRE-EMPLOYMENT TEACHER-TRAINING AND TRAINING TEACHERS IN SERVICE

Pre-Employment Teacher-Training. — The selection and professional preparation of trade school teachers are functions assumed directly by the Department. Selection is becoming increasingly difficult owing to the large numbers of applicants who are thoroughly qualified in their respective trades.

The professional preparation is given through an intensive course, 120 hours in length, which includes principles of vocational education, trade analysis, methods of teaching, and supervised practice, all of which is commonly given in the evening. During the past year two such classes were conducted: in Boston and Worcester, respectively. Of 192 candidates who applied, 44 men in 15 trades were admitted and graduated, itemized as follows: Architectural drafting, 3; automobile, 4; brick-laying, 1; cabinet making, 2; carpentry, 2; electricity, 6; machine drafting, 3; machine shop, 7; painting and decorating, 1; pattern making, 4; plumbing, 2; presswork, 1; printing, 3; radio, 4; steam engineering, 1.

An alternative method of meeting the training requirements is a full-time course of four weeks' duration, conducted during the summer at the Fitchburg State Teachers College. This course was omitted in 1933, owing to the curtailed demand for new and replacement teachers.

Evening school instructors are usually graduates of these same classes. When and where a special need occurs, modified courses of similar nature are organized for evening trade extension teachers. One such course was conducted this year at the Boston Trade School, enrolling 14 men from 10 trades.

A special course for training academic teachers who were subject to the teacher-training requirement was conducted for teachers in Boston and vicinity. Eleven men were enrolled in this course.

Training Teachers in Service. — All teachers are expected to complete five years of professional improvement work in addition to such work as may be necessary for them to do in order to meet in full the minimum requirements for their positions. After the five-year period, the automatic annual improvement program ceases and further professional improvement is left to the teacher and to the director of the school, subject always to the concurrence of the State Department.

Instructors in trade subjects in day schools must show evidence of maintaining the command of their trade and trade knowledge by employment in or approved contact with the trade for a reasonable period, at least once during every five years of service. Supervisors of teacher-training pass upon the fulfillment of this requirement as occasion demands.

While it is important that work in the trade should constitute part of the professional improvement, at least two of the required five years' work should be attendance upon approved specialized professional courses, dealing with the type of education in which the teacher is employed. Eight such courses were conducted

for employed teachers during the past school year: at Boston Trade School (two), Worcester Boys' Trade School (two), Springfield Trade School, Newton Trade School, Medford Vocational School, and Quincy Trade School.

A summer conference for vocational directors and teachers was conducted at Fitchburg State Teachers College, July 5-8, 1933. It was attended by 223 teachers and directors. One section of this conference, on Methods of Teaching Radio Work, continued through a second week.

Much of the professional improvement of teachers in service is of informal nature, handled through visits to individual teachers on the job, and the giving of aid and suggestions as needed. A total of 439 such visits was recorded during the school year 1932-1933.

A conference of fire department officials and drill masters was held at Worcester, June 26-30, 1933, to develop a plan and methods for the conduct of fire fighting schools throughout the State. Mr. Frank Cushman of the Federal Board for Vocational Education was the instructor in charge. Eighteen men, designated by their respective departments, completed the full week's conference.

Zone Schools for Training Firemen. — As a result of the above conference and in co-operation with the Massachusetts Fire Prevention Committee and the Fire Chiefs' Club, ten zone schools for training firemen were organized under the direction of the Vocational Division. The supervisors of teacher-training were assigned the responsibility for this program by the Director of the division.

As organized, ten sessions of two hours each were scheduled: five sessions on drill evolution and five on the theory of fire fighting. Closing exercises are planned for each school, and special certificates will be presented to those who complete the course.

These schools were established in the following centers:

Zone	Center	Location	Opening Date	Number Enrolled	Towns and Cities Represented
5	Arlington . . .	Highland Station . . .	Sept. 9	43	20
9	Springfield . . .	Dwight Street Fire Station . . .	Sept. 23	51	20
8	Worcester . . .	Central Fire Station . . .	Sept. 30	41	19
2	New Bedford . . .	Station 10 . . .	Oct. 7	19	7
4	Brookline . . .	Station E, Devotion Street, Off Babcock Street . . .	Oct. 14	39	14
6	Lowell . . .	West Sixth Street Station . . .	Oct. 14	28	10
10	Pittsfield . . .	Central Fire Station . . .	Oct. 21	30	11
7	Haverhill . . .	Water Street Engine House . . .	Oct. 28	37	13
1	Falmouth . . .	Central Fire Station . . .	Oct. 28	47	17
3	Brockton . . .	Central Fire Station . . .	Nov. 4	55	25

Four all-day conferences of trade school directors and selected department heads were held, each concentrated upon a consideration of one specific department, as follows: At Springfield Trade School, November 18, 1932, automobile; at Newton Trade School, March 10, 1933, electrical; at New Bedford Vocational School, May 11, 1933, machine; and at the Holyoke Vocational School, November 17, 1933, sheet metal.

On Friday, October 6, 1933, an all-day conference of superintendents of schools and directors of continuation and vocational schools was called by Commissioner Smith to discuss the National Industrial Recovery Act and the Codes of Fair Competition and the problems which might involve vocational education and continuation schools. Use of federal funds for relief and rehabilitation purposes was also discussed. The conference was held in the Hearing Room of the Metropolitan District Commission Building.

Director Robert O. Small was in charge of this conference which was attended by approximately 100 superintendents and directors.

Mr. Gorton James, representative of the New England N. R. A., addressed the conference.

TRADE, INDUSTRIAL, AND HOMEMAKING EDUCATION

GIRLS AND WOMEN

The facilities of the Trade School for Girls, Boston, and the David Hale Fanning Trade School for Girls, Worcester, have continued to be available for the retraining of unemployed adults.

Due to the local employment situation, the Marlborough Shoe School has been temporarily discontinued.

The trade extension class in dressmaking at the David Hale Fanning Trade School for Girls, Worcester, was not conducted this year as there was no demand for this instruction.

The Department has continued to co-operate with the State Department of Public Health in conducting a second class in home hygiene for a group of convalescing patients at the Lakeville Sanatorium in Middleborough.

The Department has prepared menus based on the low-cost food lists suggested by the nutritionists of the State Department of Public Health. These menus show how the suggested grocery order can be distributed throughout the week. These menus have been used in classes conducted in Lowell, Haverhill, and Fitchburg through co-operation with the Welfare Department, Tuberculosis Association, Social Service Agencies, and the Americanization Division.

A bulletin, "A Course of Study in Home Economics Education for Senior High Schools," has been made available for distribution in mimeographed form. The original material, prepared by the Home Economics Committee and assisted by a sub-committee of home economics teachers in senior high schools, was revised in accordance with the findings indicated in the "Survey and Report of Home Economics in Massachusetts — 1927," and then distributed to superintendents of schools and teachers of home economics for examination, trial, and criticism. Their suggestions have been considered, and, as far as possible, incorporated in this bulletin.

The outline, "Methods of Teaching Home Management," was developed by Miss Edna P. Amidon, Agent, Home Economics Education, Federal Board for Vocational Education, Washington, D. C., working with a group of household arts and girls' continuation school teachers at the Fitchburg Conference of July, 1932. This outline has been distributed to members of this conference group only, and these teachers are attempting to work out in their classes some of the suggestions made. This outline was further discussed and developed at the Fitchburg Conference of July, 1933, with members of the original group, and others.

The child study programs have been further developed in both the household arts and girls' continuation schools.

New day household arts schools have been established in the high schools at Barnstable and Webster.

The day household arts schools have been discontinued in Hatfield and Quincy.

For financial reasons the entire practical art programs have been temporarily discontinued in the following communities: Chelsea, Quincy, and Waltham.

The following units in the practical art program have been re-established: Dressmaking in Beverly and Everett, and foods in Chicopee.

The practical art program has been extended to include units of instruction in home management in Brockton.

PRE-EMPLOYMENT TEACHER-TRAINING AND TRAINING TEACHERS IN SERVICE

Pre-Employment Teacher-Training. — The four-year vocational household arts course at Framingham State Teachers College continued as previously reported, and in June, 1933, graduated teachers well qualified for teaching in vocational and continuation schools. During the year 1932-1933, continued opportunity for apprentice teaching for periods of nine weeks was given to vocational household arts students in the Quincy and New Bedford Vocational Schools; also the Springfield Technical and Commercial High Schools. Students obtained trade experience in foods and clothing as in former years.

In Boston during the school year, an eighty-hour teacher-training course was conducted for qualified practical art candidates.

At the 1933 Fitchburg Summer School, the usual teacher-training courses were

conducted for candidates qualified for teaching respectively in trade, continuation or household arts schools, or practical art classes for women. These courses dealt with the principles and philosophy of vocational education, and methods of teaching, including practice teaching, in the respective types of schools.

Training Teachers in Service. — During the school year 1932-1933 the women supervisors made 393 visits to continuation and vocational schools for girls and women, 907 visits to individual teachers, and rendered special service to 218 teachers both in connection with school visits and in office conferences. These contacts by State supervisors are for the purpose of assisting local authorities in maintaining and promoting satisfactory standards of work.

Teachers have continued with satisfactory professional improvement programs of study and research which have been of definite value to them in their school work. While most of the professional improvement of teachers is on an individual basis, certain courses are conducted by the division when a considerable number of teachers have a similar need. Instruction, relating to the selection of clothing, was given by the assistant supervisor to groups of practical art and other teachers in the following communities: one each in Lawrence and New Bedford, two in Worcester, and three in Boston.

Teacher-training projects in emergency foods and nutrition and in the renovation of clothing were carried on by the assistant supervisor in co-operation with the State and local Welfare, Health and Education Departments in Lowell, Haverhill, and Fitchburg. This instruction was for the purpose of giving teachers additional training necessary for conducting similar subsequent projects. In this connection the Department has prepared menus based on the low-cost food lists suggested by the nutritionists of the State Department of Public Health. These menus show how the suggested grocery order can be apportioned for the entire week. This material has been distributed not only to vocational, continuation, and other schools, but to social and health agencies, as requested.

Another number of the "News Letter for Practical Art Classes for Women" was issued in March, 1933. The main themes were "What the Present Economic Situation is Teaching Us," and "Making the Most of What We Have." Concrete suggestions were given as to ways in which teachers could assist homemakers in adjusting to limited budgets.

At the Fitchburg Summer School, 1933, professional improvement conferences were held from July 5 to 21, for four days, two, or three weeks, for supervisors and teachers of continuation, household arts, practical art, and industrial schools.

All conference members considered activities, problems and methods of teaching in their respective type of school, and attended the forum. During the forum period, special speakers discussed important topics relating to personal adjustment.

As in former conferences, each teacher selected from the following program that which would help her most in her school work: Advanced dressmaking and fashion sketching; design principles as applied to clothing and home furnishings; nutrition, especially in low-cost and emergency diets; problems in management; home repairs; and finishing and re-finishing of furniture, including instruction in the papering of a room.

National Headquarters of the American Red Cross conducted a special intensive one-week conference for graduate nurses who are teaching. Special emphasis was given to the revised life-saving methods and first aid.

The one-week conference in Story Telling, with practice in telling stories to a group of small children, was again conducted.

This extensive and vital program was made possible by the co-operation of the Massachusetts Departments of Public Health, Agriculture, and Mental Diseases, by the Massachusetts Division on the Necessaries of Life, the Boston Better Business Bureau, the Family Welfare Society of Boston, the Judge Baker Child Guidance Center, the Massachusetts Societies of Mental Hygiene and of Social Hygiene; also commercial agencies.

At the Fitchburg Summer School, 107 teachers in continuation and different types of day vocational schools attended the professional improvement conferences and teacher-training courses for varying lengths of time.

ART IN INDUSTRY AND BUSINESS

The part-time art courses in industry and business carried on co-operatively between the Division of Vocational Education and the Massachusetts School of

Art have been continued as set up last year, technically classified as part-time co-operative schools of vocational art.

Mr. John E. Alcott, Head of the Design Department of the Massachusetts School of Art, is supervisor in charge of this work and devotes three and one-half days a week to this field.

The supervisor carried on a large part of the instructional program in addition to organizing and supervising all courses.

Two instructors in addition to the supervisor were employed; one a printing consultant, and one from a firm of interior decorators.

Six issues of the "Art News Letter" have been published during the year and distributed to about four hundred Massachusetts business organizations.

In connection with this work one meeting of an Advisory Committee, composed of ten leaders in the industrial field, has been very profitably attended with definite and concrete results which have been put to use.

The supervisor co-operated with the Industrial and Civic Art Committee of the Boston Chamber of Commerce in directing and carrying on a series of manufacturers' meetings.

Four classes of apprentices were held during the year.

These classes in industrial art were held co-operatively as follows:

Painters and Decorators,	Color for Interiors
Massachusetts School of Art, Boston	
L. G. Balfour Company,	Design and Style Analysis
Attleboro	
Dennison Manufacturing Company,	Commercial Design — Typography
Framingham	
Hood Rubber Company,	Design Applied to Rubber Footwear
Watertown	

During the year 1933, there was a total enrolment of 102 members in the above co-operative art classes, with a total of 908 student hours.

CONTINUATION SCHOOLS

General employment conditions and administration of N. R. A. codes prohibiting employment in industry of those under 16 years of age, have brought about a very greatly reduced membership in Massachusetts continuation schools during 1932-1933. Schools in Malden, Northampton, and Clinton were suspended during the year.

The resources of the continuation schools have been very widely used to serve selected groups of boys and girls from the regular schools, marking time in those schools while waiting for employment. This has been done on a non-State-aided basis. It has resulted in keeping together a continuation school organization which could more adequately serve the working minor and more effectively care for the educational and guidance needs of the other group.

Problems in the work of the continuation school have changed in character as new conditions in the employment of minors have developed. Follow-up visiting by the teachers, for example, has been the means of securing for working minors a better and more considerate treatment in the matter of wages. In the girls' work it has been possible to supplement the training in employment (housework) by training in the school. In the boys' work the emphasis has turned toward a training for jobs to be held in the future rather than supplementing training on jobs now held. Other changes have occurred and have been met in loyal and effective service by continuation school teachers.

The regular course (120 hours) in the pedagogy of the continuation school was conducted by the Department at the State Teachers College, Fitchburg, during the month of July. A professional improvement conference of all directors of these schools was also conducted at Fitchburg.

During the school year 1932-1933, the men supervisors made 72 visits to continuation schools and 54 visits to individual teachers. Special service was rendered to 20 teachers. During the year, instruction was given in these schools to 8,834 different minors. The net maintenance reimbursement cost showed a decrease of \$196,656.79 from the figures of the previous year. The tuition reimbursement was \$13,995.02 less than for the preceding year. A comparative statement regarding enrolment and courses offered in these schools, as compiled November, 1921 and 1933, follows:

VOCATIONAL, PRACTICAL ART, HOUSEHOLD ARTS, AND GENERAL IMPROVEMENT COURSES IN CONTINUATION SCHOOLS

REHABILITATION SECTION

LEGISLATION

No new legislation which directly affected the work of the Rehabilitation Section was enacted during the 1933 session of the Legislature.

ADMINISTRATION AND PROCEDURE

The procedure of the Rehabilitation Section which was established in 1921 has its basis in the case work method. Broad interpretations of well-defined policies give each physically handicapped individual who seeks the help of the Department as much opportunity as possible to benefit under them. Information about disabled persons comes to the attention of the Rehabilitation Section from many sources: the Department of Industrial Accidents, other public departments, the disabled person himself, or through an interested medical or social agency. A survey is taken of the principal facts that concern a rehabilitation program: educational background, medical history, and past industrial experience if any. During the first personal interview, every effort is made to show the prospective trainee how he himself may best establish leads toward training for employment and stress is placed on all the assets of his past experiences and his personality. After this preliminary vocational counsel, such follow-up as is necessary to place and supervise him in training and eventual employment or to place him into immediate employment with supplementary training when necessary is undertaken by the staff of the Rehabilitation Section. Programs for training are strictly vocational in character and as definite as possible in the matter of job objective. No physically handicapped person should assume that the Rehabilitation Section cannot help him until he has discussed his particular problem with one of its staff. For a full statement of the services of the Rehabilitation Section the Bulletin of the Massachusetts Department of Education, "Vocational Rehabilitation for Persons Disabled in Industry or Otherwise," should be consulted.

CO-OPERATION

The co-operation of all agencies and individuals who come into contact with the physically handicapped is cordially invited and urged. It is only through the continued co-operation of the Department of Industrial Accidents and other State departments, of schools, social agencies, labor unions, insurance companies, hospitals, and employers that programs planned by the Rehabilitation Section can be truly successful. The willingness of employers to plan with State supervisors in terms of job objectives for Rehabilitation training is especially gratifying. Their kindness and that of many others is hereby gratefully acknowledged.

MAINTENANCE

In 1923 through legislative enactment, the Rehabilitation Section became empowered to provide maintenance during training for certain of its trainees. Applications for maintenance are accepted only from persons who are eligible and susceptible for training under the supervision of the Rehabilitation Section (See the Bulletin of the Massachusetts Department of Education: "Vocational Rehabilitation for Persons Disabled in Industry or Otherwise") and who are under special expense in the matter of living costs due to the training program, as planned, toward a definite job objective. Under the rules and regulations of Chapter 74, Section 22B, G.L. (Ter. Ed.), approved by the Governor and Council, the applications for maintenance are submitted directly to the Rehabilitation Section and are referred to the Department of Public Welfare for their report. That Department investigates the financial circumstances of the physically handicapped person, reports as to the exact needs, and arranges the necessary budget.

Eight persons applied for maintenance during the year ending November 30, 1933. The applications were referred to the Department of Public Welfare for investigation. Approval was granted to seven applicants and one application was disapproved.

STATISTICS

Covering the period August, 1921, to November 30, 1933, the Rehabilitation Section has offered its services to 7,318 persons in the Commonwealth. Of that number 3,024 persons were registered; 1,297 persons were returned to suitable employment and cases of 1,291 persons were closed for various other reasons. Classification of registrants is set out in the table on page 62.

During the period December 1, 1932, to November 30, 1933, 115 persons were entered in training by the Rehabilitation Section. Public institutions used in 54.78 per cent of the cases were the principal means of training. Private institutions were used in 9.57 per cent. Since the correspondence courses were almost wholly those given by the Massachusetts Division of University Extension, the number trained through them may be added to that trained in public institutions, showing that public educational facilities were used in 60.87 per cent of the total number of training cases. The occupations for which training was given included the following:

Accountant	Gardener
Automobile mechanic	Hand compositor and job printer
Automobile painter	Housekeeper
Automobile repairman	Job pressman
Barber	Laboratory worker
Bookbinder	Library worker
Bookkeeping machine operator	Linotype mechanic
Cabinetmaker	Linotype operator
Cashier	Machinist
Chemist	Mechanic
Cigar maker	Newspaper reporter
Clerk	Night watchman
Clerk and time keeper	Photo engraver
Commercial artist	Photographer
Commercial designer	Photo retoucher
Cost clerk	Poultry keeper
Costume designer	Pressman
Draftsman	Proofreader
Architectural	Rodman
Mechanical	Secretary
Steel	Shoe repairman
Tracer	Shoe stitcher
Dressmaker	Show card writer
Electrician	Sign painter
Electric welder	Stenographer
Engineer	Tester—electric refrigerators
File clerk	Typist
Floriculturist	Typewriter repairman
Foreman laborer	Upholsterer
Foreman machinist	Watch and clock repairman
Furniture finisher

Below is a summary of the work of the Rehabilitation Section from August, 1921, to November 30, 1933:

Contacts	55,827
Prospects listed	7,318
Cases registered	3,024
Registrants put in training	1,607
Registrants placed after training	774
Registrants placed without training	537
Registrants rehabilitated	1,297
Registrants closed for all other causes	1,291

EVALUATION

Vocational rehabilitation means the rendering of a vocationally handicapped person fit to engage in remunerative employment. The rehabilitation programs are planned when possible with a definite job objective in view, consideration having been given to the physical, mental, and vocational capacities of the individual applying. So far as possible programs are also on an economic competitive basis rather than upon a basis of sympathy and tolerance for the physically handicapped.

A study of recorded statistics shows conclusively that training on the job (employment training) under actual working conditions, supplemented by such theory as the employer recommends, is the most satisfactory type of a rehabilitation program. For with the handicapped, as with the normal individual, it is economically true that "when *production* begins, *dependency* ceases."

During the State fiscal year, December 1, 1932, to November 30, 1933, a study was made of 121 cases in which employment, while the trainee was pursuing a course of rehabilitation, was a feature. The average weekly earnings of this group at the time of reference to the Rehabilitation Section was \$1.90. After placement, the average weekly earnings of this group increased to \$14.31. The increased earnings amount to \$12.41 weekly and represents an annual payroll of \$78,083.72. Many of these placements were at the minimum scale paid in the various occupations and these earnings represent much less than the ultimate earning power when complete rehabilitation is accomplished.

ILLUSTRATIVE CASES

Disabled persons cannot be rehabilitated in groups. Due to varying degrees of disability, education, age, capacity, energy, spirit, and determination among individuals, each case presents its own specific problem and requires the planning of a special program. The following cases are given as typical of what has been accomplished in vocational rehabilitation during the past year.

Public Institutional Training

In an industrial accident at a copper plant a young man of 20 years was badly burned especially about the arms and shoulders. There followed fifteen months of constant supervision by doctors in a hospital from which he emerged permanently disfigured in many ways and vocationally handicapped by virtue of the fact that he could no longer raise either of his hands above the shoulders. His finger grip, however, was excellent, and his courage good. Conferences by the Rehabilitation agent with the young man's employers and the insurance company showed that they were intending for lack of better plans to put him to work on an inspection job that required little or no skill and was generally done by girls at a low rate of pay. The Rehabilitation agent, having studied the plant's operations, advised that he take training at a trade school in mathematics and drafting in order that he might return to the former employer in the capacity of a trained draftsman. Everyone concerned fell in with this suggestion. The young man, still on compensation, was enrolled in a trade school as a special student and was closely supervised by the Rehabilitation Section which made sure he obtained the training which would be most useful to him on the proposed job. He applied himself through a long summer term and a full school year, and in the following fall once again entered regular employment with the company for which he had been working at the time of his accident. In light of his new technical knowledge and despite the fact that he is so badly handicapped for heavy work, Case No. 2575 is now earning his former wage of \$27.50.

Private Institutional Training

Case No. 2392, 20 years of age, had been an outstanding student for three years in a large city high school and had been uniformly clever in mathematics and the classics. He had expected to go on to college with the aid of scholarships and by working throughout the course, but in the summer before his senior year in the high school he began to have great difficulty in hearing and his last year at school was a steady struggle to keep up to his standard of marks. College and its lectures in spite of the lip reading of which he at once began the study were under his new physical handicap and the financial conditions now quite out of the question. The school, finding him naturally discouraged under his disappointment, referred him for advice to the Rehabilitation Section. A talk with him revealed with what impatience he was viewing all study that did not lead directly to earning a livelihood and his desire to do something tangible and remunerative for which his deafness would not handicap him. Finding that he had some ability in drawing, the Rehabilitation Section suggested that he study show-card writing and sign painting. With a little effort he was able to make definite plans about entering upon work after he had

obtained training, and the Rehabilitation Section agreed to pay his tuition at a private school where intensive work in this line is a specialty. Fortunately, he secured a part-time job in another line and was therefore able to continue without great financial pressure through two full years of evening school. At the end of his training, he went into the shop of an elderly sign painter who gave him a free hand to work out his ideas and was duly impressed with the new methods that he brought from the school. A period of apprenticeship gave him confidence to set up in a modest way a shop of his own. His handicap is now no longer the dominating factor of his life, for he enjoys his work and already earns about \$20 a week.

Employment Training

Case No. 2642 just under twenty years of age was a congenitally deaf young man who was the possessor of both a good school record and an all-absorbing hobby — that of amateur photography. When he first applied to the Rehabilitation Section, in order to obtain training in some trade by which he could earn his living, he mentioned this interest and brought with him work that he had done at home in taking and printing photographs. The Rehabilitation Section recognized that this enthusiasm for photography was a real asset and set out to interview a number of commercial photographers with samples of the young man's work. Each expressed an interest in the boy and the work shown him, but due to business conditions none felt that he could plan to give him training on the job and eventual employment. At last, however, a well-known firm that employs many people felt that the young man's interest and his powers of concentration, which were partly due to his physical handicap, would mean especially good material for their printing room. After several conferences with the boy and the employers, it was finally agreed that the Rehabilitation Section should supervise a training program covering all the routine and technical processes of the business. From the first it was evident that the boy's interest was keen, and, although for a brief part of the training period the Rehabilitation Section paid his transportation expenses, he was soon earning a small wage. As his skill developed, he was given more responsible work and an increase in pay. A change in staff afforded him the opportunity to go on the payroll as a full-time worker. He now earns \$15 a week and will eventually be able to carry on any branch of the photography business.

Case No. 2029 was that of a young woman who as a baby had lost a foot in a street accident. She was referred to the Rehabilitation Section by the lawyer to whom at the age of seventeen she was applying in an unsuccessful effort to collect damages. She was at that time a sophomore in the commercial course in high school and, after having talked with her teachers, the Rehabilitation Section advised that she continue in the course she had selected. After her graduation, it was arranged by this Department that she should enter part-time employment training at a large hospital where she did typing and mimeographing. As she spoke the language of her parents as well as English, the Rehabilitation Section stressed contact with her own foreign group, and through a local agency learned who could be most readily approached among its business men. The lead proved to be worthwhile, for she is now employed in the office of a foreign newspaper that serves this group and is receiving a wage of \$12 weekly.

Combination Service

Case No. 2781, injured in a public street accident that led to the amputation of his left leg above the knee, without friends and in need of an artificial appliance and of suitable skilled training — such was the plight of the young man whose story follows. A local social agency, finding him without means, referred him for the services of the Rehabilitation Section. At the first interview with the boy, the Rehabilitation agent discussed the trades for which he could profitably train and surveyed all the agencies that might help him meet the expense of the artificial leg. The young man was most co-operative, followed every lead given him, and reported regularly at the Rehabilitation office, but it was clear that the fact that he approached employers on crutches was preventing him from obtaining consideration. The agent suggested that the social agency which had originally referred him should advance one-half the cost of the artificial appliance, which it presently did, and this money in accordance with its policies the Department was able to match

for immediate purchase of the limb. As soon as the young man had learned to walk with the new leg, the agent made intensive efforts toward an employment training program and found an employer who agreed to take him on to learn buffing and polishing of metal parts. With the small wages that he earned on this program, he at once began to reimburse the agency that had helped him purchase the appliance. Four months on the job proved his adaptability and gave him the right to work at piece work rates. He now averages \$22 a week.

A state-wide Survey of Crippled Children first brought the Case No. 2227 to the attention of the Rehabilitation Section. He was at that time a senior in a small high school and had been handicapped since the age of ten by a stiff knee and a leg-shortage that necessitated a heavily built-up shoe. Although he lived in a semi-rural district, he had little or no interest in agriculture or poultry and had taken the general course at school without much idea of how he was eventually to earn his living. The school principal spoke enthusiastically of the young man and approved the recommendation of the Rehabilitation Section that he might do well to study printing upon his graduating from the local school. The young man, who did not know a great deal about printing, accompanied the Rehabilitation agent to a trade school in the nearest city, was given an opportunity to watch all phases of the work and at the end of a day there decided that he would be interested in entering this type of industry. At once the question of how he was to get to and from training arose. His family could not afford to let him board in the city, but clearly he could not reasonably commute so great a distance each day. A prominent printer of the city was visited and told the story. Having seen the young man, he tentatively promised to give him employment at the end of the training period, should his ability justify it. With this promise of employment and the clear need of financial assistance to insure the success of the program, the Rehabilitation Section was able to accept an application for maintenance during the time that the young man would have to live away from home. This application, in accordance with the procedure developed in these cases, was investigated by the Department of Public Welfare and, after it had been approved by them, the young man entered training at the trade school for a specified period of one year. He proved successful and capable in the way he handled the printing and, through the Rehabilitation agent who supervised the case, the prospective employer was kept in touch with him during the training. In spite of business conditions, he was able to begin work in a shop that deals largely in advertising news-matter. The firm was interested in him and paid him an initial wage of \$10 a week. The Rehabilitation Section encouraged him to continue his trade education after he had been placed by arranging for him to attend evening classes, and already his training and industry have increased the first wage to \$18 a week.

Placement

Case No. 1748, 18 years of age, handicapped by a dislocated hip that obliged him to carry a crutch, wished to prepare himself for sedentary work, and, basing his hopes on the promises of the catalogue of a private commercial college, he enrolled there directly upon his graduation from high school with his parents paying the tuition. Although his record at the commercial school was excellent for two years, he was still completely out of touch with industry at the end of the training. He discussed his case with the Rehabilitation Section and asked help in obtaining work. The agent promised to keep him in mind and gave him advice and suggestions as to how best to contact employers. While interviewing on other business an employment manager of a large manufacturing establishment, the Rehabilitation agent took the opportunity to tell him of the boy's excellent school record and the manager expressed a willingness to talk with the young man. This personal interview convinced the employer that the calibre of the young man's work would be high and he arranged to employ him as an invoice clerk and bookkeeper at \$23.40 a week.

Correspondence Training

Case No. 2282 a young married man of thirty years broke down on the job which he had been carrying for ten years. His heart could not, it appeared, stand the strain of so strenuous a business any longer. He had been engaged in wholesale selling and, therefore, was by no means ignorant of the principles of commerce.

During the long convalescence that followed his initial illness, the Rehabilitation Section after planning a program that should lead to sedentary work, gave him several correspondence courses in Advanced Bookkeeping under the supervision of the Division of University Extension and, as he grew well enough to go out for part of each day, supervised a part-time school program at a public high school. Six months' personal contact with teachers emphasized much of the information he had already been given in the correspondence courses. Through this service he was able to obtain a job as bookkeeper with a firm that dealt in the product that he had formerly sold and where consequently his knowledge of terms and procedure was of value. His beginning wage of \$15 will increase as his experience and the training which he hopes to continue make him more capable of carrying greater responsibility.

Rehabilitations

During the year ending November 30, 1933, complete rehabilitation was effected in 121 cases.

DIVISION OF UNIVERSITY EXTENSION

In this fiscal year, the Division of University Extension has passed the half-million mark in its total number of students who have enrolled in correspondence courses, in extension classes, and in courses by radio since the division was established in 1916. The new total at the close of the fiscal year was 501,514. The number of enrolments during the year was 30,135, distributed as follows: — 2,762 in correspondence courses, 27,276 in 518 classes held in 34 cities and towns, and 97 in courses by radio. A comparison of these figures with those for the preceding year reveals a decrease of 2 per cent in the total enrolment, a decrease of 9 per cent in correspondence courses, a decrease of 2 per cent in classes, and an increase of 26 per cent in courses by radio. Despite the general downward trend, these figures show slight improvement over the preceding year in that the decreases are smaller.

Having experienced one year of decreasing enrolment, the division was prepared to plan its activities in accordance with changed conditions and was able to adjust its expenditures more closely to expected returns. The expenditures for the fiscal year were \$158,401.28 and the total returns to the State Treasury for enrolment charges for courses and for other educational services were \$140,242.18. In its financial statement, the division should also receive credit for the correspondence instruction it has given without charge to inmates of certain county, State, and federal institutions and for the educational films it has furnished without charge to State teachers colleges. These "free" services have represented this year a monetary value of \$1,314.50. By adding this amount to the total returns made by the division to the State Treasury and by subtracting their sum from the expenditures, the net cost to the Commonwealth for maintaining the division last year was \$16,844.60; the cost per student was 56 cents. These figures compare very favorably with last year's net cost of approximately \$31,000 and student cost of \$1.

PROGRAMS OF COLLEGE WORK

The Demand for Degrees

Various reports of this division have called attention to the wide demand for degrees not only from teachers but from that part of the general public which has intellectual interests and ambitions. An increasing leisure is encouraging many men and women to undertake definitely organized and comprehensive programs of study with a degree as the desired goal. The Committee on University Extension, representing ten educational institutions in greater Boston, has been offering for many years in Boston and Cambridge extension courses leading to the degree of Adjunct in Arts. The classes meet in the late afternoon, in the evening, or on Saturdays. The enrolment charges are nominal because the Commission is supported in part by an endowment of the Lowell Institute. Since the Commission was organized in 1910, the yearly registration in its courses has not been under 1,000 and for the past seven years has hovered around 1,700. This enrolment is sufficiently large to be convincing that there is on the part of employed adults a steady demand for courses leading to degrees, particularly if the instruction is offered at reasonable cost and at hours that coincide with their leisure.

Diplomas for College Work

In an attempt to foster the evident interest of men and women in advanced study and in the belief that "Better half a loaf than no bread," the division announced in a September bulletin balanced programs of study leading to special diplomas granted by the State Department of Education for the completion of sixty semester hours of work in any one of the following fields: — academic arts, music, business administration, mechanical engineering, civil engineering, electrical engineering, and practical aviation engineering. As these programs cover but one half the amount of work usually required for a bachelor's degree, students who earn diplomas will be encouraged by the division to complete their work for degrees at Massachusetts State College or at other degree-granting institutions. The program that has attracted the largest response is the one on music which follows:

Diploma in Music

Rule 1. — Applicant must be advanced in a solo instrument as evidenced by an examination or by a certificate from a reputable school or from private teachers.

Rule 2. — Of the sixty semester hours required for the diploma, thirty-eight semester hours must be earned in the following subjects:

	Semester Hours		Semester Hours
MUSIC	14	MODERN FOREIGN LANGUAGES	6
Solfeggio	(2)	French, German, or Italian	
Music Appreciation (History)	(2)	FINE ARTS	4
Art of Enjoying Music (Elementary Theory)	(2)	History of Art or Art Appreciation	
Harmonic Analysis	(2)	Drama and Opera Production	
Harmony	(2)	HISTORY	4
Piano, Organ, Violin, or Voice	(4)	U. S. History	
ENGLISH	6	European History	
English Composition	(2)	SOCIAL SCIENCES	2
Literature	(2)	Psychology	
Speech Training: Theory and Practice	(2)	NATURAL SCIENCES	2
		Physics	

Rule 3. — Elective courses (amounting to twenty-two semester hours) to make up the sixty semester hours required for the diploma, may be selected from the following subjects:

School Music Methods	Modern Trends in Architecture
Choral Music	American Government
Narration and Discussion of Themes in Music	International Affairs
Short Story Writing	Contemporary World Problems
Juvenile Story Writing	Present-day Economic Problems
Advanced Fiction Technique	Elements of Economics
Play Writing	English History
Vocabulary Building	Philosophy
Appreciation of Poetry	Social Problems
Drama	Sociology
Children's Literature	Mental Hygiene
Chemistry	Education
Biology	Dietetics
Astronomy	Interior Home Decoration
Spanish	Advanced Household Management
	Trigonometry

Alternates in the required subjects are also acceptable as elective subjects, provided they are not counted twice.

Rule 4. — Each course must be completed with a supervised examination.

The programs in other fields are similar in general pattern.

College Study in High Schools

The rapid increase in the number of students taking post-graduate work in Massachusetts high schools has created during the past few years a serious problem for local educational agencies. They feel the necessity of making every effort to assist these students but have practically no funds to provide for them adequate teaching staffs, advanced courses of study, textbooks, and the like. The division, recognizing its responsibility to assist these local efforts in any way educationally sound, proposed early in September to administrators of secondary schools a plan of co-operation that seemed practical, inexpensive, and flexible. The plan in brief is to have post-graduate students in high schools organized into study groups, provided with correspondence courses in desired college subjects, supervised in their

study by some arrangement organized by the local school, and at the conclusion of definite units of study given comprehensive examinations, on the basis of which they may receive certificates from the State Department of Education. The local high school furnishes a room and facilities for study, requires that the students attend regularly and keep up with the assignments, and also supplies such supplementary reference books and textbooks as it sees fit. The local supervising instructor may be a teacher especially employed to give full time to this activity or several teachers may be selected from the school staff to devote a portion of their time to it.

This plan is similar in operation to the service the division has for some years been rendering small high schools in enriching their curricula through correspondence courses, but the instruction provided the post-graduate students is on the college level instead of in specialized high school subjects.

Changes in Requirements for Bachelor of Science Degree

Since 1929 the Division of University Extension has co-operated with the Division of Elementary and Secondary Education and State Teachers Colleges in providing opportunities for graduates of State teachers colleges to complete their requirements for the degree of Bachelor of Science in Education through summer study and extension courses taken during the school year. Each year about 1,500 teachers have enrolled in the courses planned especially for credit toward this degree.

Two changes have recently been made in the program of summer and extension study required of graduates of two-year courses at State teachers colleges that will doubtless make the work for a degree more attractive to this group of teachers. Heretofore, two-year graduates have been permitted to submit for credit only twelve hours of work completed under auspices other than the Department of Education out of a total of sixty semester hours required for a degree, and they have been required to take thirty semester hours of the total work in residence study during the school year at a State teachers college. The number of transferable credits from other institutions has now been increased to eighteen and the residence requirement has been extended to include attendance at summer sessions of the State teachers colleges. These changes have made the program for two-year graduates conform more nearly to the practice of other colleges and have removed from the program its former disadvantages.

PROPOSED LEGISLATION

An act passed by the General Court in May, 1931, authorized the division to provide correspondence instruction, free of charge, to inmates of county and State hospitals and sanatoria, State correctional institutions, and federal hospitals located within the Commonwealth. Inmates of county prisons in Massachusetts were not included in the benefits of this legislation. The Commissioner of Education is planning to ask the next legislature to amend the act so that the inmates of county prisons may have the same opportunities for free correspondence instruction as those in State correctional institutions.

Since the passage of the act, 852 inmates of various institutions have been enrolled without charge in the correspondence courses of the division. In the past fiscal year, 316 inmates received free instruction on 2,014 lessons submitted by them to the division for correction.

NEW AND REVISED COURSES

In response to the diversified interests of adult students, the division is continually adding to its offering new courses in an ever-widening range of subjects. During the past year, class instruction was offered for the first time in aspects of fiction, choral singing, conflicting principles in teaching, development of personality through speech, diffusional processes in chemical industries, drama and opera production, education for adults, elementary Swedish, etching, fingerprinting, history of mathematics, household budget planning, intelligent living, life insurance fundamentals, literature — the backgrounds of ideas, modern trends in architecture, narration and discussion of themes in music, national recovery administration, oil burners, personal money management, philosophy made simple, practical photography, principles of human geography, production of visual aids, psychology of self-release, this changing world of ours, welding engineering, and writing publicity material.

The correspondence offering has been increased by the addition of courses in mathematics for accounting, poetry and verse writing, and vocabulary building. An entirely new correspondence course on bookkeeping principles and practices has been prepared to replace an obsolete course in this subject. The course on radio repairs has been revised to include recent developments in radio reception.

VISUAL INSTRUCTION SERVICE

The past year has seen a decided trend toward an increased use of 16 mm. films and equipment by the subscribers to the visual library of the division. The narrow width film has many advantages over the standard (35 mm.) especially for school-room use in being simple to run and light to handle, in not requiring the services of a licensed operator, in costing less for projector, films, and expressage, and in always being printed on safety stock. Also, more of the newer educational films are now being printed on 16 mm. than on 35 mm. stock.

The high rental cost of the Chronicles of America, an excellent series of photoplays produced under the direction of Yale University, has prevented many schools from using them especially in times of reduced budgets. A plan has recently been evolved whereby these Chronicles may be procured at one-third their former cost by five or ten schools in neighboring communities forming a weekly or bi-weekly circuit and assuming responsibility for passing the films on to one another in a pre-arranged order. Though there has been opportunity to form but one circuit since the plan was adopted, the reactions of school administrators to it have been generally favorable.

During the past year the division has furnished films and slides for 489 showings in 88 cities and towns in Massachusetts and has deposited with the State Treasurer receipts amounting to \$2,265.34 which it collected for this service. The number of showings has been larger by 82 than those of the preceding year but the receipts have been only one-half those of the year before. The drop in receipts despite an increase in showings is ascribable to the increased use of the low-rental films on 16 mm. stock.

SCHOLARSHIP FUND

In January, 1933, a scholarship fund of \$200 was established by an anonymous resident of Springfield to be used in defraying the enrolment charges of unemployed applicants for certain State university extension courses. The donor specified four courses then being offered in Springfield: namely, elementary accounting, house repairs, choral singing, and psychology for daily life. Notice of the availability of scholarships in these courses was made in a local newspaper and a time limit of two days set in which to make application for them. At the end of the first day, more than sixty persons had applied for the scholarships. Of them twenty-six were accepted; fourteen for the course in accounting and four in each of the other courses.

The preponderance of requests for elementary accounting indicated that most of the applicants sought instruction that might be of direct help to them in securing employment. Those in house repairs were probably motivated by the desire to save on their own home up-keep bills or to earn spare dollars by making repairs for others. The courses on psychology and choral singing helped to provide mental relaxation and an avenue of escape from the mental and spiritual depression which unemployment breeds.

The promptness with which this opportunity for free tuition was grasped indicated that the unemployed were eager to extend their education when they did not have to consider the cost of instruction nor ask for it as a charity.

EDUCATIONAL GUIDANCE

In co-operation with the Prospect Union Educational Exchange of Cambridge, the division conducted a model guidance clinic during January, 1933. The advisers found that most of the fifty clients who applied for assistance needed chiefly to be put in touch with the specific educational opportunity which would serve their particular wants best. There were some applicants, however, so mentally wearied by seeing their problems too closely and studying them too constantly that they needed being given a fresh point of view and a new approach to their solution.

While no attempt was made to train the unemployed applicants for immediate jobs, the educational programs planned for them followed the theory that there is advantage in having more than one string to one's bow, and, consequently, tended to prepare for a line of work new to the applicants, but in which the opportunities for employment were greater than in the fields for which they were originally trained.

For a number of years, the division has conducted a similar educational guidance service for persons interested in correspondence instruction. Supervisors and organizing instructors from the staff of the division have "conference evenings" in various centers of the State, and persons desirous of advice on selecting correspondence courses suited to their abilities and needs are invited through newspaper announcements to meet with the division's representatives at the local public library, chamber of commerce, high school, or other convenient meeting place selected for the conferences. In this way a considerable number of men and women are directed into those courses from which they are likely to derive most benefit.

ADULT ALIEN EDUCATION

During the school year, 1932-33, 614 classes, with a total enrolment of 12,345 students, were conducted. In the evening schools there were 435 classes with a registration of 9,057 students; there were 25 factory classes with 326 students; 59 home classes with 805 students; and 98 neighborhood and club classes with 2,157 students.

These enrolments are less than for the preceding year. Two factors have contributed largely to the reduction. The drastic municipal economy programs have seriously affected all voluntary educational activities, and more recently immigration restriction has been severe. Classes for adult aliens were, nevertheless, conducted during the school year of 1932-33 in thirty-one of the thirty-nine cities and in twenty-nine towns. An unofficial tabulation of statistics for the fall of 1933 indicates an up-turn in registration.

Within the limitations prescribed by curtailments in local expenditures, opportunities were continued for instruction of the foreign born in English and citizenship in the special classes which have always been noteworthy in Massachusetts. Factory classes, which are conducted with the support of plant executives and foreman, with trained teachers provided by the school system and with instruction offered at convenient hours, are still serving a useful purpose. The resumption of industrial activity will undoubtedly enlarge the scope of these offerings.

Home classes for mothers, many of whom are illiterate and of limited educational attainment at the time of enrolment, have suffered some decline during the school year. A large number of mothers, who are entirely unable to attend schoolhouse classes and to whom the special methods of teaching as provided in the home classes are especially important, have been given, despite retrenchments, full opportunities for learning. With an improvement in local financial situations, these classes undoubtedly will be again extended.

Co-operating agencies have continued their marked interest in the program of adult alien education. Such organizations as women's clubs, service clubs, racial societies, welfare organizations, state departments, and others have loyally supported this important work and rendered invaluable co-operation.

The development of the program of adult continuation (or intermediate) education has necessarily been somewhat delayed, due to the causes outlined above. There is a marked interest in promotion of this program which is designed to "bridge the gap" between basic elementary education and the whole field of formal and informal educational opportunity in academic, vocational, and avocational subjects available in evening high schools and University Extension courses. A tentative course of study in this field, which outlined instruction in everyday economics, everyday science, everyday civics, everyday arithmetic, English structure, literature, and educational guidance, has become increasingly helpful.

Teacher training courses entitled, "Problems and Procedures in Adult Alien Education," were given, as in preceding years, in several communities during the year and in Boston during the summer.

STATISTICS

FINANCIAL REPORT OF THE DEPARTMENT OF EDUCATION

Dec. 1, 1932, to Nov. 30, 1933

Expenditures

NOTE. — There are 224 towns in unions, — 189 State-aided, 35 not State-aided. Of the foregoing unions, those numbered 20, 24, 34, and 49 were authorized by special acts of the legislature.

III. TOWNS OF LESS THAN 500 FAMILIES AND STATE AID FOR HIGH SCHOOL EDUCATION THEREIN, SCHOOL YEAR ENDING JUNE 30, 1933

Explanation of Abbreviations and Symbols in Table

In column 5 —

"Acad." denotes that high school education was furnished by a high school not under the order and superintendence of the school committee.

In columns 5 and 7 —

"Excess" denotes that the ratio of the valuation to the net average membership of the schools exceeded the corresponding ratio for the Commonwealth; consequently, the town received no high school aid or tuition reimbursement.

In column 7 —

*denotes valuation over \$1,000,000; reimbursement, **one-half**.

†denotes valuation of \$500,000 to \$1,000,000; reimbursement, **three-fourths**.

No symbol, valuation less than \$500,000; reimbursement, **in full**.

In column 8 —

†denotes that the town expended from local taxation for the support of schools less than \$4 per \$1,000 valuation; consequently, the town received no high school transportation reimbursement.

*denotes said expenditure was between \$4 and \$5 per \$1,000 valuation; reimbursement, **one-half**.

†denotes said expenditure was between \$5 and \$6; reimbursement, **three-fourths**.

No symbol, said expenditure was over \$6; reimbursement, **in full**.

TOWNS	Families, United States Census, 1930	LOCAL HIGH SCHOOL				ATTENDANCE AT HIGH SCHOOLS IN OTHER TOWNS OR CITIES			Total State aid for high school education
		Years in course	Resident pupils in membership of high school	Number of teachers based on time devoted to high school	State aid	Resident pupils attending public high schools in other towns and cities	State reimbursement for tuition	State reimbursement for transportation

¹ Third year of junior high school.

Summary

Towns that maintained four-year high schools	22½	38
Received State grant	22½	
Did not receive State grant because "valuation per pupil" was in excess of the corresponding ratio for the Commonwealth	16	
Towns sending pupils to high schools in other towns or cities		110
Tuition expenditures:		
Reimbursed in full	25½	
Reimbursed three-fourths	25	
Reimbursed one-half	32	
Not reimbursed	28	

¹ In addition, Bolton, Cummington, East Brookfield, Princeton, Sterling, West Brookfield, and Westminster maintained high schools of less than four years, and received the State grant.

² Twenty-five of these towns received reimbursement in full for both tuition and transportation expenditures.

Transportation expenditures:

Reimbursed in full	103 ¹
Reimbursed three-fourths	5
Reimbursed one-half	1
Not reimbursed	1

Total 148

¹ Twenty-five of these towns received reimbursement in full for both tuition and transportation expenditures.

List of State-aided High Schools

Ashby, Ashfield, Bernardston, Bolton, Brimfield, Brookfield, Charlemont, Charlton, Chester, Cummington, East Brookfield, Essex, Huntington, Mendon, Millis, New Marlborough, New Salem, Northfield, Norwell, Plainville, Princeton, Rutland, Sheffield, Sterling, Stow, West Brookfield, Westminster, West Newbury, Williamsburg — 29.

IV. CERTIFICATION OF TEACHERS FOR STATE-AIDED HIGH SCHOOLS

Teachers in State-aided high schools (of which there were 29 in the year 1932-33) are required by section 12, chapter 71 of the General Laws, to hold certificates issued by the Department of Education. Teachers in other high schools and teachers in elementary schools are not required to hold State certificates. Applicants are usually issued certificates on credentials without examination.

Two classes of certificates are now granted, namely, term and special. A general certificate was granted prior to July 1, 1912. The requirements for these certificates are stated in a circular of information which may be obtained from the Department of Education.

The total number of high school teachers' certificates granted up to December 1, 1933, was as follows:

General, 587; Preliminary, 1,183; Special, 918; Term, 1,672; Life, 6. Total 4,366.

V. COUNTY TRAINING SCHOOLS

The following table gives a list of the county training schools in the State for the commitment of habitual truants, absentees, and school offenders:

COUNTY TRAINING SCHOOL	LOCATION	SUPERINTENDENT
Essex	Lawrence	James R. Tetler
Hampden	Springfield	Major William H. McGarry
Middlesex ¹	North Chelmsford	J. Earl Wotton
Worcester	Oakdale	Alton W. Pierce

The counties of Barnstable, Berkshire, Bristol², Dukes, Franklin, Hampshire, Nantucket, Norfolk², and Plymouth² are exempted by law from maintaining training schools of their own, but the county commissioners of each of these counties are required to assign an established training school as a place of commitment for habitual truants, absentees, and school offenders. The places designated by several commissioners are as follows: *Berkshire County*, Springfield; *Dukes, Franklin*, and *Hampshire Counties*, North Chelmsford.

Number of Pupils Attending, Admitted, and Discharged; also Teachers Employed

COUNTY TRAINING SCHOOL	Enrolled July 1, 1932	Enrolled July 1, 1933	Admitted during the year	Discharged during the year	Average attend- ance	Teachers employed
Essex	85	79	42	44	83	3
Hampden	24	17	12	19	20	2
Middlesex ¹	83	86	76	73	83	3
Worcester	25	28	9	6	24	2
Totals	217	210	139	142	210	10

¹ Under the law, commitments from Boston, Chelsea, Revere, and Winthrop in Suffolk County must be to the training school for the county of Middlesex.

² Norfolk, Bristol, and Plymouth Union Training School was discontinued August 1, 1933. (Ch. 295, sec. 2, Acts of 1933.)

VI. STATISTICS OF SCHOOLS IN STATE INSTITUTIONS FOR THE YEAR ENDING Nov. 30, 1933

STATE INSTITUTIONS	NUMBER OF PUPILS					Number of Teachers
	Enrolled Dec. 1, 1932	Enrolled Dec. 1, 1933	Admitted during the year	Discharged during the year	Average attend- ance	
State Industrial School for Girls, Lancaster	290	247	225	268	298	17
Lyman School for Boys, Westborough	246	233	224	237	228	17
State Industrial School for Boys, Shirley	323	278	533	578	300	25
Totals	859	758	982	1,083	826	59

VII. GENERAL SCHOOL FUND (Chapter 70, General Laws)

Distribution under Part I (Nov. 20, 1933):

General	\$5,212,354 52	
Supplementary	516,202 35	
		\$5,728,556 87

Distribution under Part II (March 10, 1933):

Towns in which the proportionate amount paid by such towns of every thousand dollars of State tax as established by the last preceding valuation made for the purpose of apportioning such tax:

Class I — 8c or less	\$54,294 03

Class III — More than 16c but not more than 40c	208,793 01	
Class IV — More than 40c but not more than 50c	80,427 15	
		\$415,794 40

From income tax (Part I)	\$5,728,556 87	
From income of Massachusetts School Fund (Part II)	242,223 42	
From income tax (Part II)	173,570 98	
		\$6,144,351 27

STATE-AIDED VOCATIONAL EDUCATION

TABLE NO. 1. — *Roster of State-aided vocational and part-time schools*

School Year ending August 31, 1933

ONE HUNDRED SIXTY-SEVEN (ALL) SCHOOLS IN OPERATION DURING THE YEAR
(OR NOW) IN 72 CITIES AND TOWNS LISTED CHRONOLOGICALLY BY TYPES OF
SCHOOLS, WITH DATES OF ESTABLISHMENT AND NAMES OF DIRECTORS

Group I. Thirty day industrial schools (boys)

Smith's Agricultural (Northampton), Oct., 1908; Herbert N. Loomis.
New Bedford Vocational, Nov., 1909; William R. Mackintosh.
Newton Trade, Feb., 1909; James Forbes.
Worcester Boys' Trade, Feb., 1910; Walter B. Dennen.
Somerville Vocational School for Boys, Sept., 1910; Harry L. Jones.
Lowell Vocational, Sept., 1911; Thomas F. Fisher.
Springfield Trade, Sept., 1911; George A. Burrridge.
Westfield Trade, Sept., 1911; Chester C. Derby.
Boston Trade, Feb., 1912; Edward M. McDonough.
Quincy Trade, Sept., 1912; Elijah P. Barrows.
Holyoke Vocational, Sept., 1914; Matthew S. Herbert.
Diman Industrial (Fall River), May, 1916; Frederick H. Rundall.
Independent Industrial Shoemaking School of the City of Lynn, Aug., 1918;
Michael J. Tracey.
Chicopee Trade, Sept., 1921; John H. Sullivan.
Weymouth Vocational, Feb., 1924; Francis E. Whipple, Jr.
Vineyard Haven Carpentry School (Tisbury), Sept., 1925; Henry A. Ritter.
Beverly Trade, Nov., 1926; Edgar A. Winters.
Haverhill Trade, Nov., 1926; Chester P. Spofford.
Everett Trade, Sept., 1927; James T. Gearon.
Pittsfield Vocational, May, 1928; John F. Moran.
Waltham Trade, Sept., 1928; Harold L. Pride.
Brighton Industrial, Feb., 1929; Percy A. Brigham.
Charlestown Industrial, Feb., 1929; Maurice J. Moriarty.
Dorchester Industrial, Feb., 1929; Arlon O. Bacon.
East Boston Industrial, Feb., 1929; Walter H. Naylor.
Hyde Park Industrial, Feb., 1929; Martin L. Olson.
South Boston Industrial, Jan., 1929; Thomas A. Roche.
Memorial High (Roxbury) Industrial, Sept., 1929; Patrick J. Smith.
Medford Vocational, Nov. 1930; Melvin V. Weldon.
Cole Trade, Day (Southbridge), Mar., 1932; Clark H. Morrell.

Group II. Two day industrial schools (girls)

Trade School for Girls, (Boston), Sept., 1909; Esther L. McNellis.
David Hale Fanning Trade School for Girls (Worcester), Sept., 1911; Grace A. Gilkey.

Group III. Thirteen evening industrial schools (men)

New Bedford Evening Vocational, Nov., 1907; William R. Mackintosh.
Lawrence, Mar., 1908; Francis X. Hogan.
Boston Trade School, Evening Classes, Oct., 1908; Chester B. Hammond.
Chicopee Evening Trade, Oct., 1908; John H. Sullivan.
Newton Evening Vocational, Feb., 1909; James Forbes.
Worcester Boys' Evening Trade, Feb., 1910; Walter B. Dennen.
Everett, Oct., 1911; Henry A. Bonin.
Quincy Evening Trade, Oct., 1911; James N. Muir.
Waltham Evening Trade, Dec., 1915; Harold L. Pride.
Springfield Evening Trade, Feb., 1916; George A. Burrridge.
Beverly, Nov., 1916; Edgar A. Winters.
Lynn Evening Industrial Shoemaking, Jan., 1927; Michael J. Tracey.
Medford Evening Vocational, Nov., 1930; Melvin V. Weldon.

Group IV. Evening industrial schools (women)

Not conducted 1932-1933.

Group V. Twenty-nine day homemaking schools

New Bedford Household Arts, Nov., 1907; William R. Mackintosh.
 Smith's Household Arts (Northampton), Oct., 1908; Herbert N. Loomis.
 Lowell Vocational, Sept., 1911; Thomas F. Fisher.
 Essex County School of Homemaking (Hathorne), Sept., 1914; Fred A. Smith.
 Quincy School of Homemaking, June, 1916; Ruth C. Cowles.
 Fall River Household Arts, Nov., 1919; Hector L. Belisle.
 Boston Household Arts, Feb., 1920; Mabel E. Bowker.
 Somerville Household Arts, Nov., 1920; Mary H. Brown.
 Everett Household Arts, Mar., 1921; Frederick A. Ashley.
 Scituate Household Arts, Sept., 1921; Harold C. Wingate.
 Hadley Household Arts, Apr., 1922; James P. Reed.
 Hatfield Household Arts, Sept., 1922; Edward J. Burke.
 Pittsfield Household Arts, Sept., 1922; Vera A. Harvey (Acting).
 Weymouth Household Arts, Feb., 1924; Frederick W. Hilton.
 Westport Household Arts, Mar., 1924; Norman L. Gifford.
 Haverhill Household Arts, Sept., 1924; Albert L. Barbour.
 Falmouth Household Arts, Apr., 1925; Blynn E. Davis.
 Belchertown Household Arts, Mar., 1925; Herman C. Knight.
 Amesbury Household Arts, Sept., 1925; Carlon E. Wheeler.
 Shelburne Household Arts, Sept., 1928; George A. J. Froberger.
 Bourne Household Arts, Sept., 1928; James F. Peebles.
 Holyoke Household Arts, Sept., 1928; Howard Conant.
 Deerfield Household Arts, Sept., 1930; Marvin E. Janes.
 Worcester Household Arts, Jan., 1931; Grace A. Gilkey.
 Provincetown Household Arts, Nov., 1931; Charles A. Mitchell.
 Southbridge Household Arts, Sept., 1932; Channing H. Greene.
 Townsend Household Arts, Oct., 1932; Hamilton R. Bailey.
 Barnstable Household Arts, Sept., 1933; Ralph R. Barr.
 Webster Household Arts, Nov., 1933; Cyril C. Smith.

Group VI. Twenty-three evening practical art schools

New Bedford, Nov., 1907; William R. Mackintosh.
 Lawrence, Mar., 1908; Francis X. Hogan.
 Newton, Feb., 1909; James Forbes.
 Worcester (Independent Board), Sept., 1911; Grace A. Gilkey.
 Everett, Oct., 1911; Henry A. Bonin.
 Holyoke, Oct., 1911; William R. Peck.
 Quincy, Oct., 1911; James N. Muir.
 Somerville, Oct., 1911; Mary H. Brown.
 Boston, Oct., 1912; Joseph F. Gould.
 Methuen, Oct., 1912; Lewis H. Conant.
 Leominster, Feb., 1916; William H. Perry.
 Essex County (Hathorne), July, 1918; Fred A. Smith.
 Beverly, Sept., 1919; Gertrude F. A. Lyons.
 Waltham, Nov., 1919; William H. Slayton.
 Brookline, Jan., 1920; Gertrude E. Howe.
 Lynn, Feb., 1920; Ervin W. Engler.
 Chicopee, Nov., 1921; John J. Desmond, Jr.
 Chelsea, Dec., 1921; Leo P. Casey.
 Medford, Oct., 1922; Katherine A. Baker.
 Brockton, Nov., 1926; Kenrick M. Baker.
 Somerset, Sept., 1928; H. Freeman Bates.
 Rockport, Apr., 1929; William E. Cottle.
 Townsend, Nov., 1932; Hamilton R. Bailey.

Group VII. Fifty part-time (co-operative and compulsory continuation) schools

Co-operative schools:

Beverly Co-operative Trade, Aug., 1909; Edgar A. Winters.

Boston:

Charlestown, Sept., 1919; Maurice J. Moriarty.

Hyde Park, Sept., 1919; Martin L. Olson.

Dorchester, Sept., 1920; Arlon O. Bacon.

Brighton, Sept., 1922; Percy Brigham.

East Boston, June, 1925; Walter H. Naylor.

South Boston, Jan., 1929; Thomas A. Roche.

Memorial High (Roxbury), Sept., 1929; Patrick J. Smith.

Quincy, April, 1930; Elijah P. Barrows.

Cole Trade, Southbridge, Sept., 1919; Clark Morrell.

Weymouth, March, 1927; Francis E. Whipple, Jr.

Compulsory continuation schools:

Boston, Sept., 1914; Paul V. Donovan.

Adams, Sept., 1920; William J. McConnell.

Attleboro, Sept., 1920; Milton P. Dutton.

Beverly, Sept., 1920; Alice P. Williams.

Brockton, Sept., 1920; Kenrick M. Baker.

Cambridge, Sept., 1920; James Dugan.

Chelsea, Sept., 1920; Robert W. O'Brien.

Chicopee, Sept., 1920; John H. Sullivan.

Clinton, Sept., 1920; Thomas F. Gibbons.

Everett, Sept., 1920; James T. Gearon.

Fall River, Sept., 1920; Charles E. Reed.

Fitchburg, Sept., 1920; Watson Otis.

Haverhill, Sept., 1920; William W. Dunbar.

Holyoke, Sept., 1920; Matthew S. Herbert.

Lawrence, Sept., 1920; Francis X. Hogan.

Leominster, Sept., 1920; Rodney E. Poland.

Lowell, Sept., 1920; Thomas A. Ginty.

Lynn, Sept., 1920; Ralph W. Babb.

Malden, Sept., 1920; Andrew B. Walker.

Marlborough, Sept., 1920; James T. O'Connor.

New Bedford, Sept., 1920; Edward T. N. Sadler.

North Adams, Sept., 1920; Justin W. Barrett.

Northampton, Sept., 1920; Leonard R. Wilkinson.

Northbridge, Sept., 1920; James S. Mullaney.

Pittsfield, Sept., 1920; John F. Moran.

Quincy, Sept., 1920; Dana B. Clark.

Salem, Sept., 1920; Agnes V. Cragen.

Somerville, Sept., 1920; Everett W. Ireland.

Southbridge, Sept., 1920; Clark H. Morrell.

Springfield, Sept., 1920; Carroll W. Robinson.

Taunton, Sept., 1920; Frank L. Caton.

Waltham, Sept., 1920; William H. Slayton.

Watertown, Sept., 1920; Franklin P. Keating.

Webster, Sept., 1920; Stephen L. Sadler.

Worcester, Sept. 1920; Thomas F. Power.

Gloucester, Sept., 1921; Ernest W. Fellows.

Milford, Sept., 1921; Almorin O. Caswell.

Andover, Sept., 1923; Carl M. Gahan.

Newton Voluntary Continuation School for Girls, Sept., 1927; Jessica F. Meserve.

Group VIIc. Apprenticeship schools (classes)

South Boston, Nov., 1932; Thomas A. Roche.

Group VIId. Vocational art schools (classes)

Massachusetts School of Art, Nov., 1927; John E. Alcott.

Group VIII. Four agricultural schools

Smith's (Northampton), Oct., 1908; Herbert N. Loomis.
 Bristol County, Sept., 1913; George H. Gilbert.
 Essex County, Oct., 1913; Fred A. Smith.
 Norfolk County, Oct., 1916; Charles W. Kemp.
 Weymouth Branch, Oct., 1916; Hilmer S. Nelson, Instructor.

Group IX. Fifteen vocational agricultural departments with names of instructors (day)¹

Hadley, Jan., 1912; Paul W. Brown.
 Ashfield, Aug., 1913; Lewis H. Black.
 Reading, May, 1915; Herman T. Wheeler.
 Worcester, May, 1917; John E. Gifford.
 Boston (Jamaica Plain), Nov., 1918; Thomas P. Dooley.
 New Salem, Sept., 1919; R. Arthur Lundgren.
 Shelburne, March, 1920; John G. Glavin.
 West Springfield, Apr., 1920; Herbert F. Bartlett.
 Falmouth, Sept., 1920; Lewis B. Robinson.
 Hatfield, Aug., 1921; Edward J. Burke.
 Westport, Aug., 1925; Karl H. Erickson.
 Hanover, April, 1927; Herbert T. Hatch.
 Agawam, Aug., 1929; Louis H. Moseley.
 Dartmouth, Sept., 1929; Charles F. Oliver.
 Westfield, Oct., 1931; J. Lowell Williams.

Group X. One vocational agricultural department with name of instructor (evening)¹

Essex County, Dec., 1926; William B. Moore.

¹ The superintendent of schools usually serves as director.

TABLE No. 3. — Summarized financial statement — all types of schools: by cities, towns, and counties
School Year ending August 31, 1933

Key to types of schools:

- I. Day Industrial Schools (Boys).
II. Day Industrial Schools (Girls).
III. Evening Industrial Schools (Men).
IV. Evening Industrial Schools (Women).
V. Homemaking Schools (Day).

- VI. Evening Practical Art Classes.
VII. Part-time Co-operative, Compulsory Continuation and Apprenticeship Schools.
VIII. Agricultural Schools.
IX. Agricultural Departments (Day).
X. Agricultural Departments (Evening).

	Grand Total, All Expenditures (f, i) (line 25, page 4, Annual Returns)	Total Construction (item g, page 4, Annual Returns)	Total Equipment (item h, page 4, Annual Returns)	Total Maintenance (a-e) (item f, page 3, Annual Returns)	Total Gross Maintenance cost (in- cludes cost to places paying tu- tion) Column 5 of this table plus items on tuition affidavits. 1932	1,182	—	1,182	286,466 04	—	—	—	286,466 04

¹ The totals in this column include "Ownership projects" and "Other supervised farm work," thus the old and new tabulations may be compared as to volume of agricultural earnings.

² Earnings from "Other work" were reported during the years 1912 to 1919 as a check on the motives of pupils and a measure of their real interest in agriculture. Every year, with the "Home project" methods dominant in instruction, agricultural interest had been evident and agricultural earnings so overwhelmingly predominant that returns on "Other work" have been discontinued since 1919.

The Commonwealth of Massachusetts

ANNUAL REPORT

OF THE

DEPARTMENT OF EDUCATION

FOR THE YEAR ENDING NOVEMBER 30, 1933

TABULATION OF THE SCHOOL RETURNS
SCHOOL YEAR ENDING JUNE 30, 1933

PART II

ANNUAL REPORT DEPARTMENT OF EDUCATION.

PART II INTRODUCTION

Previous to 1929 the statistics in the Annual Reports had been presented on the basis of eight elementary grades and four high school grades. The junior high school has been introduced into the public schools of Massachusetts to the extent that, at the present time, more than half of the pupils in grades 7, 8, and 9 are in school systems in which the junior high school has been established.

In this Report for the school year ending June 30, 1933, statistics for those towns still on the 8-4 plan of organization are reported as heretofore. In the case of towns having the junior high school unit, the statistics are reported (in accordance with a ruling of this department for more uniform classification), on the 6-3-3 plan.

In the case of cities or towns having the 6-2-4 system, superintendents have allocated statistics, both financial and vital, to fit in with the 6-3-3 or 8-4 plan.

There are school systems organized on the 6-6 basis, the high school offering six years of work. Such schools have been included with the 6-3-3 organizations. Columns 51 to 53, inclusive, designate the exact plan of organization in effect in each city or town.

TABULATION OF SCHOOL RETURNS

EXPLANATION

The table beginning on page 4 gives the principal items in the annual school returns from the 355 cities and towns of the Commonwealth.

To find any particular city or town use the index on pages 2 and 3.

In the table the cities and towns are divided into four groups, and arranged within each group in the order of population, as follows:

	Index Numbers
Group I. Cities	1-39
Group II. Towns of 5,000 population or over	40-122
Group III. Towns of less than 5,000 population and maintaining public high schools	123-230
Group IV. Towns of less than 5,000 population and not maintaining public high schools	231-355

It is to be noted that—

(1) All per capitas, with the exception of those in the tables on elementary schools, junior high schools, high schools, and column 47A are based upon the *net* average membership in the public schools.

(2) The rank of each city and town on the basis of the per capita expenditure is for the particular group in which it is classed. For the State rank of each city and town, see Graduated Valuation Table, the last table of this compilation.

(3) In computing the amount raised by local taxation for the support of the public schools, all reimbursements received from the State on account of school expenditures, and all contributions received from sources other than local taxation, have first been deducted from the total expenditure.

The columns containing any particular item have the same number throughout the table. They contain the following data:

Column Number	
1.	<i>Population</i> , United States Census of 1930.
2.	<i>Valuation</i> , as of April 1, 1932. These valuations include supplementary assessments made between the 10th and the 20th of December, 1932, on property as of April 1, 1932.
3-7.	<i>Teaching staff</i> in public day schools.
8-15.	<i>Pupils in public day schools</i> .
16-28.	<i>Itemized expenditures for support</i> of all public schools, year ending June 30, 1933.
29-31.	<i>Expenditures for outlay</i> , including new grounds, buildings and alterations, and new equipment, year ending June 30, 1933.

Column
Number

- 32, 33. *Valuation per pupil*, based on the net average membership of the public day schools for the year ending June 30, 1933, and the rank in its group of the city or town based thereon.
- 34, 35. *Expenditures per \$1,000 valuation* for school support from funds raised by local taxation, fiscal year next preceding June 30, 1933, and the rank in its group of the city or town based thereon.
- 36, 37. *Rate of total tax per \$1,000 valuation* for 1932, and the group rank of the city or town based thereon.
- 38-48. *Expenditures for school support, classified as to sources* from which the funds were received. These expenditures are for the city or town fiscal year next preceding June 30, 1933, which in all towns and nearly all cities ended Dec. 31, 1932. These columns contain also the rank in its group of each city and town on the basis of the per capita expenditure from funds received from local taxation, from the State, and from all sources.
49. *General School Fund.* Part II, Chapter 70, General Laws.
50. *General School Fund.* Part I, Chapter 70, General Laws.
- 51-53. *Number of year grades* in elementary schools, junior high schools, if any, and senior high schools.
- 54-67. *Day elementary schools.* (Grades I to VIII.)
- 68-81. *Day elementary schools.* (Grades I to VI.) Junior high system.
- 82-94. *Junior high schools.* (Grades VII, VIII, and IX.)
- 95-107. *Day high schools* in cities and towns in Groups I, II, and III. (Junior high system, Grades X, XI, and XII.)
- 108-121. *Day high schools* in cities and towns in Groups I, II, and III. (8-4 system.)
- 122-129. *Expenditures for high school education* in Group IV, which are towns not maintaining public high schools.
- 130-146. *Persons 5 to 16 years of age*, October 1, 1932, classified in the three age groups, 5 to 7, 7 to 14, and 14 to 16. In each group there is given the number in the registration of minors in public schools, and in private schools; also the distribution of such minors in the membership of the schools of the State.
- 147, 148. *Illiterate minors, 16 to 21 years of age*, October 1, 1932.
- 149-168. *Pupils in each grade.* (8-4 system.) Membership in public day schools, October 1, 1932, classified as to grade.
- 169-188. *Pupils in each grade.* (Junior high school system.) Membership in public day schools, October 1, 1932, classified as to grade.
- 189-218. *Training of teachers.* (Elementary, junior high, and senior high schools.)
- 219-224. *School buildings.* Number in use January 1, 1933.
- 225-227. *School buildings.* Distributed by schools.
228. *Total valuation of school property.*

INDEX OF CITIES AND TOWNS.

The number preceding the name of the city or town indicates its place in the table that follows.

114 Abington	305 Blandford	152 Cohasset

¹ Decrease.² Separate data not available in 1923.³ Not including evening Americanization pupils.

GRADUATED VALUATION TABLE

The cities and towns within each of the following groups are arranged in the descending order of their valuation per pupil in the net average membership, column 1. Columns 1, 2, 3, 4, and 5 of this table are based on columns 32, 34, 39, and 47B, respectively, of the Tabulation of the School Returns.

GROUP I. CITIES

CITIES	VALUATION OF 1932 PER PUPIL IN NET AVERAGE MEMBERSHIP, YEAR ENDING JUNE 30, 1933		EXPENDITURE FOR SCHOOL SUPPORT FROM LOCAL TAXATION, FISCAL YEAR 1932, PER \$1,000 VALUATION	PER CAPITA COST FOR SUPPORT OF PUBLIC SCHOOLS, FISCAL YEAR 1932
